*Ugly, Useless, Unstable Architectures* Miguel Paredes Maldonado,2019-11-04 *Ugly Useless Unstable Architectures* traces productive intersections between architecture and the discourses of Post Structuralism and New Materialism It investigates how their unique ontological regimes can be mobilised to supersede the classical framework that still informs both the production and the evaluation of architecture Throughout its three main chapters this enquiry challenges one of the most prevalent tropes of architectural assessment Beauty Utility and Stability Author Miguel Paredes Maldonado critically unpacks the spatial and operational qualities of these three idealised concepts before setting out an alternative framework of spatial practice that draws from Gilles Deleuze s post structuralist take on the production of the real and Manuel DeLanda s model based branch of New Materialism This book reads and situates a series of spatial works through the lens of this critical methodology to contest the conceptual aspects traditionally underpinning architectural value It posits that architecture can operate as a continuous generative spectrum encompassing a broad range of potential configurations Written for academics and students in architectural theory design and contemporary philosophical thought alike this book should appeal to a wide audience **ICAR 2015 - ABSTRACTS** Andra PANAIT,2015-03-26 International Conference on Architectural Research
