Managing Colleges and Universities Allan M. Hoffman, Randal W. Summers, 2000-06-30 Hoffman and Summers provide both a conceptual framework and practical approaches relevant to leadership issues in higher education. This book offers solutions for those in leadership positions or those anticipating a position in higher education. It focuses on everyday operational problems and will provide the current or future reader with guidelines for action. Higher education leaders must have both a sense of the past and a vision of the future. The world is changing rapidly and these changes will have an inevitable and profound impact on higher education. Institutions that fail to respond to the trends taking place around them will not likely survive with significance very far into the new millennium. This book offers help in making the transition from traditional manager/administrator to a valued leader in higher education.

Practical Leadership in Community Colleges George R. Boggs, Christine J. McPhail, 2016-06-20 Anticipate, manage, and overcome the complex issues facing community colleges. Practical Leadership in Community Colleges offers a path forward through the challenges community colleges face every day. Through field observations, reports, news coverage, and interviews with leaders and policy makers, this book digs deep into the issues confronting college leaders and provides clear direction for managing through the storm. With close examination of both emerging trends and perennial problems, the discussion delves into issues brought about by changing demographics, federal and state mandates, public demand, economic cycles, student unrest, employee groups, trustees, college supporters, and more to provide practical guidance toward optimal outcomes for all stakeholders. Written by former presidents, including a past president of the American Association of Community Colleges, this book provides expert guidance on anticipating and managing the critical issues that affect the entire institution. Both authors serve as consultants, executive coaches, and advisors to top leaders in higher education institutions and leadership development programs throughout the United States. Community colleges are facing increasingly complex issues from both without and within. Some can be avoided, others only mitigated, but all must be managed, and college leaders must be fully prepared or risk failing the students and the community. This book provides real-world guidance for current and emerging leaders and trustees seeking more effective management methods with practical insight and expert perspective. Tackle the college completion challenge and performance-based funding initiatives. Manage through economic cycles, declining support, and calls for accountability. Delve into the issues of privatization and employee unionization. Execute strategies to align institutional goals and mission. Manage organizational change and new ways of thinking that are essential in today's competitive environment. Manage issues involving diversity, inclusiveness, and equity. Prepare adequately for campus emergencies. Community colleges are the heartbeat of the nation's higher education system and bear the tremendous responsibility of serving the needs of a vast and varied student body. Every day may bring new issues, but effective management allows institutions to rise to the challenge rather than falter under pressure. Practical Leadership in Community Colleges goes beyond theory to provide the practical guidance leadership needs.

to more effectively lead institutions to achieve results and serve the students and the community
