Mathematical Reasoning for Elementary Teachers (7th Edition)

Description :

Long/De Temple/Millman's Mathematical Reasoning for Elementary Teachers presents the mathematical content needed for teaching within the context of the elementary classroom, giving future teachers the motivation they need while also showing them the bigger picture of when they will use and teach the concepts. The program endeavors to answer the frequently-asked question "Where are we learning this?" by going beyond skill explanations and showing the ways that these concepts are implemented in the future classroom and what types of questions children may ask. Now updated to include the Common Core State Standards for Mathematics, the text imparts mathematical reasoning skills, a deep conceptual understanding, and a positive attitude to those who aspire to be elementary or middle school teachers. ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering

Mathematical Foundation For Elementary Teachers:

A Mathematical Foundation for Elementary Teachers Patricia Jones, Kathleen D. Lopez, Lee Ellen Price, 1997-08 This text was written in response to the recommendations of A Call to Change and the vision of the NCTM Standards Its goals are to present important challenging mathematics relevant to a Standards based K 8 curriculum and to prepare prospective elementary teachers to implement the Standards in their own classrooms Students acquire an understanding of mathematics that is considerably broader than that which they will be required to teach They develop number sense spatial sense and mathematical intuition and are able to explain mathematical concepts relationships and processes clearly and correctly This text helps the future teacher to see elementary school mathematics as a Big Picture in which important interconnected ideas are developed and applied from K through 8 They learn from experience that mathematical understanding begins with concrete models and then progresses through verbal numerical and finally abstract stages As a result they become confident successful problem solvers and develop an appreciation for the power and beauty of mathematics and an enthusiasm for teaching it
