December issues include semiannual index **A History of Mathematics in the United States and Canada** David E.
Zitarelli,Della Dumbaugh,Stephen F. Kennedy,2022-07-28 This is the first truly comprehensive and thorough history of the
development of a mathematical community in the United States and Canada This second volume starts at the turn of the
twentieth century with a mathematical community that is firmly established and traces its growth over the next forty years at
the end of which the American mathematical community is pre eminent in the world In the preface to the first volume of this
work Zitarelli reveals his animating philosophy I find that the human factor lends life and vitality to any subject History of
mathematics in the Zitarelli conception is not just a collection of abstract ideas and their development It is a community of
people and practices joining together to understand perpetuate and advance those ideas and each other Telling the story of
mathematics means telling the stories of these people their accomplishments and triumphs the institutions and structures
they built their interpersonal and scientific interactions and their failures and shortcomings One of the most hopeful
developments of the period 1900 1941 in American mathematics was the opening of the community to previously excluded
populations Increasing numbers of women were welcomed into mathematics many of whom including Anna Pell Wheeler
Olive Hazlett and Mayme Logsdon are profiled in these pages Black mathematicians were often systemically excluded during
this period but in spite of the obstacles Elbert Frank Cox Dudley Woodard David Blackwell and others built careers of
significant accomplishment that are described here The effect on the substantial community of European immigrants is
detailed through the stories of dozens of individuals In clear and compelling prose Zitarelli Dumbaugh and Kennedy spin a
tale accessible to experts general readers and anyone interested in the history of science in North America *Monthly
