## **Man Made Future:**

**Man-made Futures** Nigel Cross, David Elliott, Robin Roy, 1974      **Technological Visions** Marita Sturken, Douglas Thomas, Sandra Ball-Rokeach, 2004 For as long as people have developed new technologies there has been debate over the purposes shape and potential for their use In this exciting collection a range of contributors including Sherry Turkle Lynn Spigel John Perry Barlow Langdon Winner David Nye and Lord Asa Briggs discuss the visions that have shaped new technologies and the cultural implications of technological adaptation Focusing on issues such as the nature of prediction community citizenship consumption and the nation as well as the metaphors that have shaped public debates about technology the authors examine innovations past and present from the telegraph and the portable television to the Internet to better understand how our visions and imagination have shaped the meaning and use of technology Author note Marita Sturken is Associate Professor in the Annenberg School for Communication at the University of Southern California and the author of *Tangled Memories The Vietnam War the AIDS Epidemic and the Politics of Remembering* and *Practices of Looking An Introduction to Visual Culture* with Lisa Cartwright Douglas Thomas is Associate Professor in the Annenberg School for Communication at the University of Southern California He is author of three books most recently *Hacker Culture* Sandra Ball Rokeach is a Professor and Director of the Communication Technology and Community Program in the Annenberg School for Communication at the University of Southern California She is author of several books including *Theories of Mass Communication* with M L De Fleur      *Projecting the Future Through Political Discourse* Patricia L. Dunmire, 2011 This monograph examines the rhetorical nature and function of representations of the future in political discourse focusing on political actors use of hegemonic images of future reality to achieve their political goals It argues that a key ideological dimension of political rhetoric lies in politicians use of projections of the future to legitimate policies and actions This argument is grounded in systemic functional and critical discourse analyses of the Bush Doctrine the U S policy response to the September 11 terrorist attacks which sanctioned a preemptive military posture By focusing on the discursive construction of the future this project addresses a lacunae in critical discourse studies and calls attention to the crucial role that the discourse and practice of futurology has played in post Cold War politics and society It will be of value to scholars interested in the discourses of politics the war on terror U S national security and futurology      **Critical Terms in Futures Studies** Heike Paul, 2019-12-02 This volume provides the essential vocabulary currently employed in discourses on the future in 50 contributions by renowned scholars in their respective fields which examine future imaginaries across cultures and time Not situated in the field of futurology proper it comes at future studies sideways and offers a multidisciplinary treatment of a critical futures vocabulary The contributors have their disciplinary homes in a wide range of subjects history cultural studies literary studies sociology media studies American studies Japanese studies Chinese studies and philosophy and critically illuminate numerous discourses about the future or futures past and present In compiling such a critical vocabulary

this book seeks to foster conversations about futures in study programs and research forums and offers a toolbox for discussing them with an adequate degree of complexity *Humanity's Rise to Superdominance, the Global Ecological Crisis, and the Way Forward for Education* Adam C. Scarfe, 2022-12-01 This book pinpoints the evolutionary connection between the global ecological crisis and transgenerational learning and education As Julian Huxley 1887 1975 described the cumulative passing down of knowledge skills and ideas by one generation to the next over eons of time which has been afforded by the advent of complex languages in the evolutionary past is chiefly responsible for humanity's planetary superdominance However given that the drive of the human species to increase its control over the natural world has today run up against ecological limits there is an evolutionary existential choice to be made in relation to the ultimate purposes of formal education Should humanity double down on the anthropocentric humanist project of superdominance including the goals of unlimited economic growth development and scientific and technological progress Alternatively should a biocentric anti humanist and or postmodernist deconstruction of formal education take place Or should a holistic organicist orientation emphasizing biological wisdom help to shape its future As this book shows the answers to these philosophical questions on the parts of educators prospective teachers and learners will going forward play a key role in deciding the evolutionary trajectories of all life forms on the planet **Sharing the World** Michael Carley, Phillippe Spapens, 2017-09-25 This work proposes a framework based on the concept of a fair distribution of environmental space to include the diverse needs of North and South Drawing on research in 38 countries it aims to give an equitable basis for global development in order to achieve sustainable consumption by the year 2050 The environmental space approach seeks to explain the limitations of the global market economy as a tool of development and to give us the means to alter it in order to achieve a genuine quality of life rather than simple economic growth In addition this book seeks to urge all countries and peoples to consider and evaluate the environmental space approach and to join in a movement towards sustainable production and consumption for the 21st century **The Crime of Aggression** Noah Weisbord, 2019-06-11 A gripping behind the scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war On July 17 2018 starting an unjust war became a prosecutable international crime alongside genocide crimes against humanity and war crimes Instead of collective state responsibility our leaders are now personally subject to indictment for crimes of aggression from invasions and preemptions to drone strikes and cyberattacks The Crime of Aggression is Noah Weisbord's riveting insider's account of the high stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start Weisbord a key drafter of the law for the International Criminal Court takes readers behind the scenes of one of the most consequential legal dramas in modern international diplomacy Drawing on in depth interviews and his own invaluable insights he sheds critical light on the motivations of the prosecutors diplomats and military strategists who championed the fledgling prohibition on unjust war and those who tried to sink it He untangles the complex history behind the measure tracing how the crime of aggression was

born at the Nuremberg trials only to fall dormant during the Cold War and he draws lessons from such pivotal events as the collapse of the League of Nations the rise of the United Nations September 11 and the war on terror The power to try leaders for unjust war holds untold promise for the international order but also great risk In this incisive and vitally important book Weisbord explains how judges in such cases can balance the imperatives of justice and peace and how the fair prosecution of aggression can humanize modern statecraft **Liquid Organization** Jerzy Kociatkiewicz, Monika Kostera, 2014-03-14

Widely known as a leading intellectual Zygmunt Bauman's thinking is often categorized as sociology or philosophy But his work has been hugely influential in other fields as well not least within organization studies From increasing management control and growing standardization of work activities to the increase in uncertainty and insecurity experienced by contemporary workers organizations themselves are becoming ever more ephemeral entities Bauman's themes globalization liquid modernity and postmodern ethics are arguably fundamental to contemporary notions of organization and management and his thinking has never been more relevant However despite the obvious and continuing influence of Bauman's ideas on business studies there has been no comprehensive attempt to chart his impact on organization theory In this innovative and insightful collection an international selection of leading management scholars explore key topics in current organizational discourse including networked organizations control and ambiguity technologies work and responsibility extending Bauman's liquid modernity to the liquid organization The book will be essential reading for scholars and academics and students in management and organizational theory and also sociology managing culture and organizational ethnography **Christian**
