too much emphasis has been placed on negative issues and that positive initiatives have been largely ignored. With the growing influence of the positive movement, this book explores the implications of using a positive approach as opposed to a stress management one and compares the types of interventions they each require. From a positive perspective, there is a need to understand the characteristics of healthy, thriving, and flourishing people and organizations. This book explores the implications of using a positive approach as opposed to a stress management one. Some of the interventions described in *Creating Healthy Workplaces* target individuals and their attitudes and behaviours; others target workplace relationships, work units, and the wider organization. Outcomes such as reduced occurrences of smoking, obesity, depression, elevated blood pressure, accidents, and workplace injuries, presenteeism, absence, and staff turnover are reported. The factors associated with the success of these interventions are identified, and advice is given as to how interested individuals and organizations might proceed to develop worksite interventions on their own.

Berlin was once the biggest industrial area in Europe, home to large-scale enterprises like AEG and Siemens. Bewag, the Berlin electricity provider, laid the foundations for a modern power supply together with these companies. Power Stations in Berlin considers numerous local power stations as an integral part of the city's architectural heritage from the period of industrialization at the beginning of the twentieth century, until now, giving a comprehensive overview of Berlin as an industrial city in the process. The question of how to reuse these unique plants is raised; the right balance between preserving the facilities and finding a new economic use for them is crucial.
