Mathematical Development:

The Development of Mathematical Skills Chris Donlan, 2022-02-16 Current research into the psychology of children's mathematics is extremely diverse. The present volume reflects this diversity; it is unique in its breadth, bringing together accounts of cutting edge research from widely differing, sometimes opposing viewpoints. The reader with a grounding in developmental psychology but no knowledge of mathematical development will enjoy a wide ranging and challenging summary of current trends. Those already familiar with some of the work may take the opportunity to broaden their knowledge and to evaluate new methodologies and the insights they offer. The book is an invitation to explore a complex set of phenomena for which no unitary explanation can be offered. It aims to show that apparently disparate research perspectives may be complementary to each other and to suggest that progress towards a comprehensive account of mathematical skills may require a broad based understanding of research from more than one viewpoint. *Mathematical Development in Young Children* Bárbara M. Brizuela, 2004 With profound implications for classroom practice, this text uses a series of interviews with Kindergarten and elementary school children to examine the significance of children's understanding and learning of mathematical notations in their development as mathematics learners. Supporting Mathematical Development In The Early Years Pound, Linda, 2006-05-01 Review of the first edition. All the major areas of early childhood maths teaching and learning are covered in this powerful book. The book is also full of delightful stories. It would be eminently suitable for beginning and trainee teachers but would also be helpful to all those concerned in early years settings. All the relevant information is here, based on a wealth of knowledge and experience. TES Supporting Mathematical Development in the Early Years provides practical guidance for parents, teachers and other early years workers who want to give children a good start in mathematical development. Showing how competent children are as mathematicians from an early age, the book offers an overview of young children's mathematical behaviour at home and in early years settings. The book defines the content and the learning curriculum required to promote mathematical thinking, including an examination of the relationship between mathematics and language learning and the role of other cross-curricular aspects such as information and communications technology (ICT). It explores the role of staff in observing, planning for and supporting children's learning by using a variety of strategies and makes suggestions for promoting effective partnerships between the parents or principal carers and early years staff. The book also considers the importance of play and imagination to the development of abstract thought. The second edition is comprehensively updated throughout and includes new material on Special Educational Needs, the very early years, the role of play, the role of ICT and examples of outdoor play. It is essential reading for early years teachers and students as well as parents who want to understand and develop their children's early mathematical learning. **Supporting Early Mathematical Development** Caroline McGrath, 2025-10-14 Supporting Early Mathematical Development is an essential text combining theory and practice to enable successful mathematical education.

Children are Born Mathematicians Eugene Geist, 2009 This brand new book for Early

Childhood Mathematics Methods classes takes a comprehensive and chronological view of mathematics development in children beginning at birth and going through the third grade It offers specific teaching suggestions for each grade level based on the newly released NCTM National Council of Teachers of Mathematics standards The new NCTM focal points for each grade are designed to help make mathematics teaching coherent and focused Knowing what the two or three most important concepts are in each grade help teachers focus their teaching and their mathematics program Using these standards can help teachers to use many different methods to reach their objectives rather than being tied to one specific method This book takes a constructivist approach meaning that children should be active learners and interact with other children in learning and constructing their knowledge The author stresses that this process is at least as important as correct answers as is comprehension of concepts Teachers should focus on questioning and promoting mathematical thinking rather than simply getting the correct answer Finally the author encourages teachers to see math as a developmental process that children engage in as they grown and develop The teacher s role is to promote concept understanding and development through active experiences and questioning techniques in combination with teaching skills in developmentally appropriate ways

Planning and Using Time in the Foundation Stage Jill Williams, Karen McInnes, 2014-04-04 Operating on two levels this book aims to help students and practitioners understand how to plan and use time effectively within the foundation stage setting The book examines how children learn and play at different times of day how they function when they might be tired or hungry and how best to organize the learning day with this in mind The authors discuss the issue of environment how children relate to different areas within their own room and what happens when routines of time and place are altered The book also discusses how to develop children s understanding of time and how to incorporate the theme of time into children s play The book includes practical activities and examples that will allow children to fully comprehend the concept of time advice on how to create time for children to learn through play inquiry and investigation sections on how time can be used to include parents colleagues and the local community This book provides in depth analysis of how effective use of time can be beneficial for parents children and staff in early years setting
