Mathematical Reviews, 2007 **Simplicius': On Aristotle On the Soul 3.1-5** H.J. Blumenthal, 2014-04-22 In On the Soul 3 1 5 Aristotle goes beyond the five sense to the general functions of sense perception the imagination and the so called active intellect the of which was still a matter of controversy in the time of Thomas Aquinas In his commentary on Aristotle s text Simplicius insists that the intellect in question is not something transcendental but the human rational soul He denies both Plotinus view that a part of the soul has never descended from uninterrupted contemplation of the Platonic Forms and Proclus view that the soul cannot be changed in its substance through embodiment He also denies that imagination sees things as true or false which requires awareness of one s own cognitions He thinks that imagination works by projecting imprints In the case of mathematics it can make the imprints more like shapes taken on during sense perception or more like concepts which calls for lines without breadth He acknowledges that Aristotle would not agree to reify these concepts as substances but thinks of mathematical entities as mere abstractions Addressing the vexed question of authorship H J Blumenthal concludes that the commentary was written neither by Simplicius nor Priscian In a novel interpretation he suggests that if Priscian had any hand in this commentary it might have been as editor of notes from Simplicius lectures
