books covering the USA Mathematical Olympiad USAMO and the International Mathematical Olympiad IMO have been published
annually by the MAA American Mathematics Competitions since 1976 This is the sixth volume in that series published by the
MAA in its Problem Book series The IMO is the work mathematics championship for high school students It takes place
annually in a different country each year The aims of the IMO are 1 to discover encourage and challenge mathematically
gifted young people in all countries 2 to foster friendships between mathematicians around the world 3 to create an
opportunity for the exchange of information on school syllabi and practice throughout the world The USAMO and the Team

The Contest

Problem Book IX Dave Wells, J. Douglas Faires, 2008-12-18 This is the ninth book of problems and solutions from the American Mathematics Competitions AMC contests It chronicles 325 problems from the thirteen AMC 12 contests given in the years between 2001 and 2007 The authors were the joint directors of the AMC 12 and the AMC 10 competitions during that period The problems have all been edited to ensure that they conform to the current style of the AMC 12 competitions Graphs and figures have been redrawn to make them more consistent in form and style and the solutions to the problems have been both edited and supplemented A problem index at the back of the book classifies the problems into subject areas of Algebra Arithmetic Complex Numbers Counting Functions Geometry Graphs Logarithms Logic Number Theory Polynomials Probability Sequences Statistics and Trigonometry A problem that uses a combination of these areas is listed multiple times The problems on these contests are posed by members of the mathematical community in the hope that all secondary school students will have an opportunity to participate in problem solving and an enriching mathematical experience

The Alberta High School Math Competitions 1957-2006 Andrew Chiang-Fung Liu, 2008 Presents the problems and answers for the first 50 years of the Alberta High School Mathematics Competition up to 2005 2006 Full solutions are provided to those from the Modern period often supplemented with multiple solutions or additional commentaries

The Contest Problem Book VIII J. Douglas Faires, Dave Wells, 2008 For more than 50 years the Mathematical Association of America has been engaged in the construction and administration of challenging contests for students in American and Canadian high schools The problems on these contests are constructed in the hope that all high school students interested in mathematics will have the opportunity to participate in the contests and will find the experience mathematically enriching These contests are intended for students at all levels from the average student at a typical school who enjoys mathematics to the very best students at the most special school In the year 2000 the Mathematical Association of America initiated the American Mathematics Competitions 10 AMC 10 for students up to grade 10 The Contest Problem Book VIII is the first collection of problems from that competition covering the years 2001 2007 J Douglas Faires and David Wells were the joint directors of the AMC 10 and AMC 12 during that period and have assembled this book of problems and solutions There are 350 problems from the first 14 contests included in this collection A Problem Index at the back of the book classifies the problems into the following major subject areas Algebra and Arithmetic Sequences and Series Triangle Geometry Circle Geometry Quadrilateral Geometry Polygon Geometry Counting Coordinate Geometry Solid Geometry Discrete Probability Statistics Number Theory and Logic The major subject areas are then broken down into subcategories for ease of reference The Problems are cross referenced when they represent several subject areas
