Mathematics Science And Postclassical Theory:

Mathematics, Science, and Postclassical Theory Barbara Herrnstein Smith, 1997-03-04 Mathematics Science and Postclassical Theory is a unique collection of essays dealing with the intersections between science and mathematics and the radical reconceptions of knowledge language proof truth and reality currently emerging from poststructuralist literary theory constructivist history and sociology of science and related work in contemporary philosophy Featuring a distinguished group of international contributors this volume engages themes and issues central to current theoretical debates in virtually all disciplines agency causality determinacy representation and the social dynamics of knowledge In a substantive introductory essay the editors explain the notion of postclassical theory and discuss the significance of ideas such as emergence and undecidability in current work in and on science and mathematics Other essays include a witty examination of the relations among mathematical thinking writing and the technologies of virtual reality an essay that reconstructs the conceptual practices that led to a crucial mathematical discovery or construction in the 19th century a discussion of the implications of Bohr s complementarity principle for classical ideas of reality an examination of scientific laboratories as hybrid communities of humans and nonhumans an analysis of metaphors of control purpose and necessity in contemporary biology an exploration of truth and lies and the play of words and numbers in Shakespeare Frege Wittgenstein and Beckett and a final chapter on recent engagements or nonengagements between rationalist realist philosophy of science and contemporary science studies Contributors Malcolm Ashmore Michel Callon Owen Flanagan John Law Susan Oyama Andrew Pickering Arkady Plotnitsky Brian Rotman Barbara Herrnstein Smith John Vignaux Smyth E Roy Weintraub

Metaphor and Analogy in the Sciences F. Hallyn, 2013-03-14 Science constructs its objects is this a metaphor It does not necessarily mean anyway that the real does not pre exist Only that in the final instance it is the Other of which we know neither the limits nor the figure and to which we only have access through the constructions we make of it Or in semiotic terms borrowed from Charles S Peirce the world is the dynamic object that intervenes in science only through the immediate objects that manifest themselves in signs And even then the choice of the term immediate is not entirely felicitous it would be better to talk of mediated objects since their conception is mediated by the conditions from which perception as well as the language that expresses it derive The preference bestowed on certain constructions over others results from the slighter recalcitrance in imagining a dynamic object through one or another mediated object This recalcitrance that prompts one to surrender constructions does not come directly from the real from the dynamic object but from other constructions Again this does not mean that reality does not exist but that it only speaks confirms and objects to the extent that it is being questioned within a certain form by certain instruments in a certain language Even if it appears recalcitrant the dynamic object intervenes only through another construction Man not nature decides on the form to be considered the instruments and language to be adopted

Yeats and Revisionism Daniel O'Hara, 2022-11-08 The book collects Daniel T O Hara s half century of essays and review essays on

Yeats and his major poetry and drama and how leading critics and theorists have sought to revise their reception for their periods of time and indeed for the future Its aim is to trace a critical history of the last fifty years even as it opens the prospects for the future of critical reading of Yeats and modern poetry

Lacan's Medievalism Erin Felicia Labbie, One of the foundational premises of Jacques Lacan's psychoanalytical project was that the history of philosophy concealed the history of desire and one of the goals of his work was to show how desire is central to philosophical thinking In Lacan's Medievalism Erin Felicia Labbie demonstrates how Lacan's theory of desire is bound to his reading of medieval texts She not only alters the relationship between psychoanalysis and medieval studies but also illuminates the ways that premodern and postmodern epochs and ideologies share a concern with the subject the unconscious and language thus challenging notions of strict epistemological cuts Lacan's psychoanalytic work contributes to the medieval debate about universals by revealing how the unconscious relates to the category of the real By analyzing the systematic adherence to dialectics and the idealization of the hard sciences Lacan's Medievalism asserts that we must take into account the play of language and desire within the unconscious and literature in order to understand the way that we know things in the world and the manner in which order is determined Erin Felicia Labbie is assistant professor of English at Bowling Green State University

Educational Leadership, Management, and Administration through Actor-Network Theory Paolo Landri, 2020-11-05

Educational Leadership Management and Administration through Actor Network Theory presents how actor network theory ANT and the related vocabularies have much to offer to a critical re-imagining of the dynamics of management in education and educational leadership It extends the growing contemporary perspective of ANT into the study of educational administration and management This book draws on case studies focusing on new configurations of educational management and leadership It presents new developments of ANT After ANT and Near ANT and clarifies how these sensibilities can contribute to thinking critically and intervening in the current dynamics of education The book proposes that ANT can offer an ecological understanding of educational leadership which is helpful in abandoning the narrow humanistic world of managerialism considering a post anthropocentric scenario where it is necessary to compose together new liveable assemblages of humans and nonhumans This book will be of great interest to academics scholars and post graduate students in the fields of educational management leadership and administration as well as education policy It will also be highly relevant to policy makers and experts of education policy at the national European and international levels

Originality and Intellectual Property in the French and English Enlightenment Reginald McGinnis, 2013-10-17 Are legal concepts of intellectual property and copyright related to artistic notions of invention and originality Do literary and legal scholars have anything to learn from each other or should the legal debate be viewed as separate from questions of aesthetics Bridging what are usually perceived as two distinct areas of inquiry this interdisciplinary volume begins with a reflection on the origins of literary and legal questions in the Enlightenment to consider their ramifications in the post Enlightenment and

contemporary world Tying in to the growing scholarly interest in connections between law and literature on the one hand and to the contemporary interrogation of originality and authorship on the other hand the present volume furthers research in the field by providing a dense study of the legal and historical context to re examine our current assumptions about supposed earlier Enlightenment and Romantic ideals of individual authorship and originality

Consciousness Prem Saran Satsangi, Stuart Hameroff, Vishal Sahni, Pami Dua, 2016-01-01 This unique volume brings together eastern and western perspectives on consciousness with essays from philosophers and scientists which emphasize different aspects of the integration The overarching aim of this book is to provide direction toward integrating Eastern philosophical and religious practice with philosophies and science of Western culture an aim that could be pivotal in understanding consciousness and its place in nature A unifying approach is adopted to the study of consciousness integrating the wisdom of the sages of the east and the scientists of the west and the stupendous east west integration that has been achieved is indeed a milestone The book will appeal to the rapidly growing mass of scientists and students in this upcoming field both in the east and west as well as the general inquisitive reader Courses in consciousness studies are being promoted in leading Universities all over the world It will also interest the followers and adherents of Eastern Philosophy of Saints and Radhasoami Faith numbering in a few millions around the globe

Virtual Mathematics Simon Duffy, 2006 *Giordano Bruno and the Geometry of Language* Arielle Saiber, 2005 *Giordano Bruno and the Geometry of Language* brings to the fore a sixteenth century philosopher s role in early modern Europe as a bridge between science and literature or more specifically between the spatial paradigm of geometry and that of language Through analysis of Bruno s writings Saiber exposes the verbal geometry of his language and shows how his writing necessitates a crafting of space and is in essence a lexicon of spatial concepts This study constitutes an original contribution both to scholarship on Bruno and to the broader fields of early modern scientific and literary studies

The Neglected Science of Motion Alberto Antonio Martínez, 2001 **Metaphorical Circuit** Joseph A.

Murphy, 2004 *Metaphorical Circuit* argues that the division of knowledge between literature and science in the modern university produced a necessity to choose that became a central animating tension for Japanese intellectuals in the early 20th century. Each chapter begins with a point in an author's work where mathematical representation becomes an issue in negotiating the boundary and follows the analysis to a wall or a point of indeterminacy that leaves the author again with a heterogeneous field. The book offers substantial original readings of a series of major figures such as Natsume Soseki, Mori Ogai, and Edogawa Ranpo, the physicist Terada Torahiko, and the critics Maeda Ai and Karatani Kjin as they write about this period. It follows its subject in introducing the styles of reasoning and inquiry of the sciences into the field of culture where it can offend.

Boundary 2, 2002 A journal of postmodern literature a symposium **Current Contents. Arts & Humanities** Institute for scientific information (Philadelphia, Pa)., **The Philosophical Review**, 1997 The Journal of Philosophy, 1997 *Modernismo, Modernity and the Development of Spanish American Literature* Cathy L. Jrade, 1998 A CHOICE Outstanding Academic Book. *Modernismo* arose in Spanish American literature as a confrontation with and a response to modernizing forces that were transforming Spanish American society in the later nineteenth century. In this book Cathy L. Jrade undertakes a full exploration of the modernista project and shows how it provided a foundation for trends and movements that have continued to shape literary production in Spanish America throughout the twentieth century. Jrade opens with a systematic consideration of the development of modernismo and then proceeds with detailed analyses of works of poetry, narrative, and essays that typified and altered the movement's course. In this way she situates the writing of key authors such as Rubén Darío, José Martí, and Leopoldo Lugones within the overall modernista project and traces modernismo's influence on subsequent generations of writers. Jrade's analysis reclaims the power of the visionary stance taken by these creative intellectuals. She firmly abolishes any lingering tendency to associate modernismo with affectation and effete elegance, revealing instead how the modernista's new literary language expressed their profound political and epistemological concerns.

In this era of rapidly developing computer technologies, a novel interdisciplinary spirit has emerged that promises a new collaboration between research and art. Computer Graphics, Interactive Arts, Scientific Visualization, Artificial Life, Chaos and Complexity, newly emerging Media Museums and Media Centers, as well as Telecommunications, are areas where artistic thinking influences science and where scientific methodology reaches into the arts. *Semiotica*, 1998
