Concordian Economics, Vol. 1 Carmine Gorga, 2023-12-11 This is the first part of a two volume set on Concordian economics a new paradigm whose core completes the Aristotelian Aquinian project of economic justice The book delves into the history of economics and presents Concordian economics as a response to the concerns and shortcomings of mainstream economics Demand side economics is represented in the process of consumption the expenditure of monetary wealth to acquire real wealth and financial wealth of a different nature In contrast supply side economics is represented in the production process the process of producing real wealth e g tables chairs and foodstuffs Institutionalists will also welcome this book because it ties the world of real wealth to that of monetary wealth through the process of distributing the value of ownership of both monetary and real wealth as they are created The book begins with an introduction to Concordian economics followed by a discussion of how to restore relevance to the field of economic studies It also presents a revision of the Keynesian model designed to gradually address the major social economic and political causes of discord Moreover the author warns against the separation of economics from the world of physical things as well as the world of legal and moral issues Following a discussion on the measurement of real wealth econometrics is introduced in accordance with the categories of Concordian economics Lastly the book develops a theory of economic justice by defining a set of economic rights and responsibilities that guide economic behavior and policy This book appeals to scholars and students of economics and related fields as well as anyone interested in reintegrating economics into the social context The Makers of Modern Economics

Arnold Heertje, 1999 The Makers of Modern Economics Volume IV builds on the three previous volumes in presenting the intellectual development of some of the twentieth century's leading figures in modern economic theory The first volume in this series was acclaimed by Professor David Audretsch as a unique insight into the thoughts and lives of prominent economists In this fourth volume Richard H Day Geoffrey C Harcourt Duncan K Foley Ken Binmore and Hirofumi Uzawa offer intimate insights into their careers and their research to date as well as taking a broader view of economics as a discipline and considering future directions They reflect on their development the problems and issues that interested them and the individuals who guided and influenced them The Makers of Modern Economics volume IV provides the academic student and researcher with a fascinating insight into the life and work of some of today's most inspiring economists

Journal of the Institute of Transport, 1927 Introduction to Mathematical Economics M.C. Kemp, Y. Kimura, 1978-10-04 Our objectives may be briefly stated They are two First we have sought to provide a compact and digestible exposition of some sub branches of mathematics which are of interest to economists but which are underplayed in mathematical texts and

dispersed in the journal literature Second we have sought to demonstrate the usefulness of the mathematics by providing a systematic account of modern neoclassical economics that is of those parts of economics from which jointness in production has been excluded The book is introductory not in the sense that it can be read by any high school graduate but in the sense that it provides some of the mathematics needed to appreciate modern general equilibrium economic theory It is aimed primarily at first year graduate students and final year honors students in economics who have studied mathematics at the university level for two years and who in particular have mastered a full year course in analysis and calculus The book is the outcome of a long correspondence punctuated by periodic visits by Kimura to the University of New South Wales Without those visits we would never have finished They were made possible by generous grants from the Leverhulme Foundation Nagoya City University and the University of New South Wales Equally indispensable were the expert advice and generous encouragement of our friends Martin Beckmann Takashi Negishi Ryuzo Sato and Yasuo Uekawa **Paul Samuelson and Modern Economic Theory** Edgar Cary Brown,1983 Economics in a golden age a personal memoir Contributions to welfare economics On general equilibrium and stability On consumption theory International trade theory Bulletin United States. Office of Education,1930 *Modern Economics* Justin Hartley Moore,William Howard Steiner,Herbert Arkin,Raymond Roosevelt Colton,1940 **Catalogue** Washington and Lee University,1902 1857 58 includes Triennial register of Alumni Introduction to Mathematical Economics Murray C.
