,1995 *El-Hi Textbooks and Serials in Print* ,2006 *Mathematics in Service to the Community* Charles Robert
Hadlock,2005 Publisher description This book looks at the wide variety of ways in which math statistics and math education
teachers have incorporated service learning into their courses These projects are not just stand alone community service
initiatives but rather they specifically target the improvement of mathematics skills and insights of the college students in the
courses with which they are associated In some cases the projects are the major focus of the courses In others they may
range from an essential component to one of several options The book also speculates about heretofore untapped possibilities
for service learning even including courses in pure mathematics College faculty often may not fully appreciate the wide
range of support mechanisms for such ventures even within their own institutions so the book includes a lengthy chapter on
the details of converting a rough idea to a solid action plan sometimes even picking up financial support and other often
unexpected benefits along the way Creative teachers rarely implement a project in exactly the same way as a colleague might
have so the emphasis here is to display a wide range of successful projects in order to encourage readers to develop some of
their own **Great Expectations?** Scott Jofus,Ilene Berman,1998 Journal for Research in Mathematics Education
