Gender, AIDS and food security Mariame Maiga,2023-09-04 This book is about the effects of AIDS on women and food security in C te d Ivoire West Africa AIDS is more than a health problem Rural households and women in particular have to cope with the lack of labour in agriculture which threatens their food security For the matrilineal Agni women land ownership appears to be an unexpected burden rather than a safeguard from poverty Culture matters but not in similar ways everywhere Matrilineal or patrilineal kinship organisation gender inequality and norms about sexual relationships very much influence the differences in Agni and migrant women s vulnerability to AIDS African women are often seen as victims of AIDS This study shows that women may also use their creativity and social networks to battle and to be resilient against the effects

of the illness in their everyday household activities Using a combination of quantitative statistical data and qualitative methods this research questions the effectiveness of mainstream AIDS policy and interventions in Cote d'Ivoire Victimising the poor does not help Instead multi sector policy intervention can mitigate the social effects of AIDS by improving household food security and by changing cultural practices through local leaders who have historical legitimacy and power The Evolution of Kinship Edwin Sidney Hartland,1922 **The History of human marriage v. 1** Edward Westermarck,1922 *The History of Human Marriage* Edward Westermarck,1922 Science Progress ,1918
