Matter Of Time Inscribed:

The Dark Abyss of Time Laurent Olivier, 2024-01-09 The field of archaeology continues to face a major crisis of interpretation The traditional view is that the basic business of archaeology is to reconstruct the history of cultures and civilizations through their material productions Olivier challenges this view with a new approach to archaeological remains based on the works of French theorists such as Foucault de Certeaux and Derrida with insight from Darwin and Freud His thesis is that archaeology does not study the past itself but rather what materially remains of the past in our present Olivier also develops an interpretation of material culture based on Aby Warburg's and Walter Benjamin's work in the anthropology of art With wider implications for history and all social sciences The Dark Abyss of Time is a major contribution to the theory of time memory heritage and archaeology This flawless translation makes Olivier's elegantly written work available in English for the first time

The Alien Communication Handbook Brian S. McConnell, 2021-10-18 Scientists have been searching for signals from extraterrestrial civilizations since Frank Drake's first radio survey in 1960 But what would actually happen if SETI's search succeeds Is there any way we could even make sense of the signal we receive Written by an expert in communication systems and translation technology this book explores the science of interstellar communication It explains how this process may unfold how an ET communication link would work the types of information it could convey and how professionals amateurs and ordinary people like you would participate in the effort to understand what another civilization has to say Along the way the book introduces readers to many aspects of modern day communication systems and computing Featured as well are dozens of illustrations photos and real world examples rounding out this compelling foray into the mechanics of interstellar communication Scientists policy makers and all interested in the likely future discovery of alien life will want to read this book Steven J Dick Former NASA Chief Historian

Memory, Metaphors, and Meaning Nicolae Babuts, 2011-12-01 Literature explores the human condition the mystery of the world life and death as well as our relations with others and our desires and dreams It differs from science in its aims and methods but Babuts shows in other respects that literature has much common ground with science Both aim for an authentic version of truth To this end literature employs metaphors and it does so in a manner similar to that of scientific inquiry The cognitive view does not imply that there is a one to one correlation between the world and text that meaning belongs to the author or that literature is equivalent to perception What it does maintain is that meaning is crucially dependent on mnemonic initiatives and that without memory the world remains meaningless Nicolae Babuts claims that at the interface with the printed page readers process texts in a manner similar to the way they explain the visible world in segments or units of meaning or dynamic patterns Babuts argues that humans achieve recognition by integrating stimulus sequences with corresponding patterns that recognize and interpret each segment of a text Memory produces meaning from these patterns In harmony with its goals memory may adopt specific strategies to deal with different stimuli Dynamic patterns link the unit

of processing with the unit of meaning In sum Babuts proposes that meaning is achieved through metaphors and narrative and that both are ways to reach cognitive goals This original study offers perspectives that will interest cognitive psychologists as well as those simply interested in the process through which literature stirs the human imagination
