Reconstructing Historic Landmarks Wayde Brown, 2018-09-03 Historic reconstructions have been a consistent part of the historic preservation and heritage conservation movements in the United States and Canada Indeed reconstruction has been the primary tool at the most influential historic sites for example the Governor s Palace and the Capitol at Colonial Williamsburg USA and in Canada the Fortress of Louisbourg Dozens of other reconstructions have appeared during the past century in North America undertaken by individuals communities states and provinces and by national agencies responsible for cultural heritage Despite this prevalence historic reconstructions have received little scholarly attention and the question of what motivated the proponents of these projects remains largely unexamined This book explores that question through detailed studies of ten historic reconstructions located throughout Canada and the United States ranging from 1908 to 2011 Drawing upon diverse archival sources and site investigations the proponents of each site are given voice to address their need to remake these landmarks be it to sustain to challenge or even subvert a historical narrative or with reference to contemporary heritage studies to reclaim these spaces *Reconstructing Historic Landmarks* provides a fascinating insight into these shifting concepts of history in North America and will be of considerable interest both to students and scholars of historic preservation and indeed to heritage professionals involved in reconstructions themselves **National Historic**
