Native Americans And Archaeologists Stepping Stones To Common Ground:

Native Americans and Archaeologists Nina Swidler, Kurt Dongoske, Roger Anyon, Alan Downer, 1997-04-08 Legal and economic factors have thrust American archaeology into a period of intellectual and methodological unrest. Issues such as reburial and repatriation, land and resource ownership, and the integration of tradition and science have long divided archaeologists and Native American communities. Both groups recognize the need for a dramatic transformation of the discipline into one that appeals to and serves the greater public. This book tackles these and other issues by elucidating successful strategies for collaboration. It includes detailed discussions of the Native American Graves Protection and Repatriation Act (NAGPRA) enacted in 1990 in effort to legislatively redefine ownership of cultural items. Perspectives range from Native American representatives from tribes throughout the U.S. to professional archaeologists and anthropologists working for tribes, federal and state agency representatives, museum specialists, and private archaeology and anthropology consultants. Published in cooperation with the Society for American Archaeology. Handbook of Landscape Archaeology Bruno David, Julian Thomas, 2016-06-03 Over 80 archaeologists from four continents create a benchmark volume of the ideas and practices of landscape archaeology covering the theoretical and the practical, the research and conservation, and encasing the term in a global framework. **Native Americans and Archaeologists** Nina Swidler, 1997 Since 1978 Daniel B. Reibel's *Registration Methods for the Small Museum* has been the definitive guide to registration methodology. Long considered an indispensable reference tool by historians and archivists, this new third edition covers topics of increasing significance such as the new accessibility of computers and the ways in which small museums can actively employ this technology with new registration software. Reibel's considerations of technology and its implications for the small museum excellently supplement the content which originally made this text a classic: an authoritative and comprehensive discussion of effective registration techniques for the small museum presented in a concise, readable manner with sample registrar's manuals/forms for immediate use. **American Indian Sovereignty and Law** Wade Davies, Richmond L. Clow, 2009-02-04 *American Indian Sovereignty and Law: An Annotated Bibliography* covers a wide variety of topics and includes sources dealing with federal Indian policy, federal and tribal courts, criminal justice, tribal governance, religious freedoms, economic development, and numerous sub-topics related to tribal and individual rights. While primarily focused on the years 1900 to the present, many sources are included that focus on the 19th century or earlier. The annotations included in this reference will help researchers know enough about the arguments and contents of each source to determine its usefulness. Whenever a clear central argument is made in an article or book, it is stated in the entry unless that argument is made implicit by the title of that entry. Each annotation also provides factual information about the primary topic under discussion. In some cases, annotations list topics that compose a significant portion of an author's discussion but are not obvious from the title of the entry. *American Indian Sovereignty and Law* will be extremely useful in both studying Native American topics and

researching current legal and political actions affecting tribal sovereignty

Political Culture, Soft Interventions and Nation Building Tiffany Jenkins, 2016-01-13 This book raises questions about cultural interventions an area of investigation somewhat overlooked in place of developing a critique of political interventions Whilst political interventions are more explicit coercive and have a wide reaching impact it is important also to examine the way culture is used in attempts to reconstruct society and peoples the soft side of statebuilding where heritage is utilised to play a role in the construction of the nation and the people in memory and identity For it can play a role in legitimizing myths and identifying symbolic historic events and implicitly informs the construction of infrastructure institutions and other aspects of civic life Contributors from the fields of politics anthropology archaeology and sociology examine interventions in state and nation building through cultural methods the soft side of statebuilding including the preservation and promotion of certain heritage the politics of remembrance and monument building and the repatriation of human remains and artefacts to communities in the name of making reparations for past atrocities These are timely contributions Heritage and cultural is too often considered in terms of how tourism might contribute to the economy post conflict neglecting the construction of meaning and memory through decisions about what is preserved or not It will be of special interest to those in the field of cultural studies archaeology and politics as well as international relations This book was published as a special issue of the Journal of Intervention and Statebuilding
