

# Population Regulation

- Factors in place to help control popltn. size
- 2 Types:
  - 1) **Density-dependant:** depend on popltn. density
    - i.e. availability of resources
  - 2) **Density-independent:** popltn. density does not matter
    - i.e. weather, floods, etc.

# Population Regulation

**Mike Jess**

## **Population Regulation:**

**Population Regulation Mechanisms in Laboratory Systems: Genetic Feedback, Density-dependence and Environmental Randomness** Paul Clough Johnson,1974 **Insect Populations In theory and in practice** Royal Entomological Society of London. Symposium University of Newcastle,1998 Insects are far and away the largest group of animals on earth with over a million described species and they occupy a wide range of ecological niches they may be herbivores predators parasites or decomposers Some are of particular economic importance as pests of agriculture and forestry as vectors of animal and human disease or as species of interest to wildlife conservation so an understanding of the processes determining their numbers is of considerable practical value **Ecology: The Experimental Analysis of Distribution and Abundance** Charles Krebs,Charles J. Krebs,2013-07-23 This best selling majors level book by Charles Krebs approaches ecology as a series of problems which are best understood by evaluating empirical evidence through data analysis and application of quantitative reasoning No otherbook presents analytical quantitative and statistical ecological information in an equally accessible style for students Reflecting the way ecologists actually practice the new edition emphasizes the role of experiments in testing ecological ideas and discusses many contemporary and controversial problems related to distribution and abundance **KEY TOPICS** Introduction to the Science of Ecology Evolution and Ecology Behavioral Ecology Analyzing Geographic Distributions Factors That Limit Distributions I Biotic Factors That Limit Distributions II Abiotic Distribution and Abundance Population Parameters and Demographic Techniques Population Growth Species Interactions I Competition Species Interactions II Predation Species Interactions III Herbivory and Mutualism Species Interactions IV Disease and Parasitism Regulation of Population Size Applied Problems I Harvesting Populations Applied Problems II Pest Control Applied Problems III Conservation Biology Community Structure Community Dynamics I Biodiversity Community Dynamics II Predation and Competition Community Dynamics III Nonequilibrium Communities Ecosystem Metabolism I Primary Production Ecosystem Metabolism II Secondary Production Ecosystem Metabolism III Nutrient Cycles Ecosystem Dynamics under Changing Climates Ecosystem Health Human Impacts **MARKET** Intended for those interested in learning the basics of ecology **Handbook of Biological Control** T. W. Fisher,Thomas S. Bellows,L. E. Caltagirone,D. L. Dahlsten,Carl B. Huffaker,G. Gordh,1999-09-20 For many years the use of chemical agents such as pesticides and herbicides has been effective in controlling the many varieties of pests that infest both agricultural crops and backyard gardens However these pests are gradually becoming resistant to these agents because the agents themselves are acting as selective factors making the pests better and better able to resist and persist As a result the use of biological controlling agents is increasing This book is a comprehensive and authoritative handbook of biological control **The Ecological World View** Charles J. Krebs,2008-04-02 Filled with many examples of topic issues and current events this book develops a basic understanding of how the natural world works and of how humans interact with the planet s natural

ecosystems It covers the history of ecology and describes the general approaches of the scientific method then takes a look at basic principles of population dynamics and applies them to everyday practical problems

**Mammalogy** George A. Feldhamer, 2007-09-07 The Class Mammalia is amazingly diverse ranging from whales to marsupials to bats to primates The more than 5 400 species occupy many habitats with mammals present on all the continents They are rare only on Antarctica and a few isolated islands Mammals present a complex set of conservation and management issues Some species have become more numerous with the rise of human populations while others have been extirpated or nearly so such as the Caribbean monk seal the thylacine the Chinese river dolphin and the Pyrenean ibex In this new edition of their classic textbook George A Feldhamer and his colleagues cover the many aspects of mammalogy Thoroughly revised and updated this edition includes treatments of the most recent significant findings in ordinal level mammalian phylogeny and taxonomy special topics such as parasites and diseases conservation and domesticated mammals interrelationships between mammalian structure and function and the latest molecular techniques used to study mammals Instructors email mammalogy press jhu edu for a free instructor resource disc containing all 510 illustrations printed in Mammalogy Adaptation Diversity Ecology third edition

**Population Regulation** Robert H. Tamarin, 1978 *Foundation Papers in Landscape Ecology*

John A. Wiens, 2007 The editors begin with articles that illuminate the discipline s diverse scientific foundations such as L
