

Population perspective and individual perspective complement each other

- Really a continuum - every health condition results from a combination of individual-level factors and population-level factors
- Thus, both perspectives are important for public health and clinical medicine, but emphases are different
- Political and institutional factors often favor the individual-level perspective

Population in Perspective, 1986 Population in perspective; ed. by L.B.Young, 1968 *Personal Health: A Population Perspective* Michele Kiely, Meredith Manze, Chris Palmedo, 2018-10-01 *Personal Health A Population Perspective* will engage your students in understanding relevant personal health issues set within a broader population health framework Unlike other Personal Health texts this book will combine information about individual health including topics of great interest and relevance to college aged students as well as a discussion of the context of community and global health to which each individual is inextricably linked Students will learn not only how personal choices affect their own health but that of their family community and the world around them Designed for fulfilling health distribution requirements or an introductory class for public health majors the authors address the principles outlined by the Association of Schools Programs of Public Health ASPPH for undergraduate public health education throughout the text **Population in Perspective** Louise B. Young, 1968 **The Medical School's Mission and the Population's Health** Kerr L. White, Julia E. Connelly, 2012-12-06 Medical schools exist as part of a complex educational and health care system with affiliations to universities teaching hospitals outpatient clinics students and communities Those of us who serve as trustees and volunteers on boards and committees of medical schools carry obvious responsibilities for the performance of the institution with regard to those affiliations including those that relate to the community By what criteria and by what standards do we as trustees assess that performance For trustees of medical schools I suggest that the most important criteria are those concerned with the purpose for which the school was originally established and those that relate to the community that supports it and is served by it For a medical school performance criteria should be defined in a statement of purpose the mission of the school This mission statement should provide trustees with direction on such vital matters as the following What does the medical school seek to accomplish Whom does it serve Where is it going What is the relationship to the geographic region or other community that it may seek to serve Such questions are stated more easily than they are answered but they should be asked For trustees who are responsible for the education of students the management of faculty and the stewardship of funds they are a matter of serious concern **A First Course in Causal Inference** Peng Ding, 2024-07-31 The past decade has witnessed an explosion of interest in research and education in causal inference due to its wide applications in biomedical research social sciences artificial intelligence etc This textbook based on the author's course on causal inference at UC Berkeley taught over the past seven years only requires basic knowledge of probability theory statistical inference and linear and logistic regressions It assumes minimal knowledge of causal inference and reviews basic probability and statistics in the appendix It covers causal inference from a statistical perspective and includes examples and applications from biostatistics and econometrics Key Features All R code and data sets available at Harvard Dataverse Solutions manual available for instructors Includes over 100 exercises This book is suitable for an advanced undergraduate or graduate level

course on causal inference or postgraduate and PhD level course in statistics and biostatistics departments Perspectives on Population Scott W.
