Portrait Of Adelaide:

Portrait of Adelaide Cedric Emanuel,1975-01-01 **Facing the Public** Anthony Halliday,2000 This work examines the effect of the French Revolution on portrait painting Portraits were the most widely commissioned paintings in 18th century France But most portraits were produced for private consumptions and were therefore seen as inferior to art designed for public exhibition The Revolution endowed private values with an unprecedented significance and the way people responded to portraits changed as a result

In the City of Flowers Or, Adelaide's Awakening Emma Marshall,1889 **The Portraitist** Susanne Dunlap,2022-08-30 Based on a true story this is the tale of Ad la de Labille Guiard s fight to take her rightful place in the competitive art world of eighteenth century Paris With a beautiful rival who s better connected and better trained than she is Ad la de faces an uphill battle Her love affair with her young instructor in oil painting gives rise to suspicions that he touches up her work and her decision to make much needed money by executing erotic pastels threatens to create as many problems as it solves Meanwhile her rival goes from strength to strength becoming Marie Antoinette s official portraitist and gaining entrance to the elite Acad mie Royale at the same time as Ad la de When at last Ad la de earns her own royal appointment and receives a massive commission from a member of the royal family the timing couldn t be worse it s 1789 and with the fall of the Bastille her world is turned upside down by political chaos and revolution With danger around every corner in her beloved Paris she must find a way adjust to the new order carving out a life and a career all over again and stay alive in the process

A 100 Year History of Portrait Photography and the Provincial Photographic Studio Graham Thomas,2025-10-06 Portrait photography immediately became the mainstay of the commercial photographic business It was the core money making idea behind photographic studios being established in the early 1840s Yet yet very little has been written about the emergence and then the development of the commercial photography business even less about those who operated outside of the major urban centres read London and instead were based in the provinces This is surprising since a number of these local photographers had a significant impact Just one example the first portraits of royalty were not taken in London but in Brighton This led to the Royal Family taking a keen interest in photography which in turn helped boost its acceptance and popularity A second would be the work of H P Robinson working in Leamington Spa an example of his work is shown at the start of this chapter A third would be the emergence of colour photography which was championed by a Stroud based photographer Of equal but rarely mentioned importance is the provincial photographer s crucial role in the recording of people and places thereby providing today s permanent visual record of every aspect of daily life Something that perhaps is taken for granted because of the ubiquitousness of the picture postcard but they possess what Roland Barthes once called the essence of photography they serve to bring the past into the present Finally their work led to the democratisation of the photographic image a phenomenon that would impact the lives of everyone and continues to this day Is there anyone who does not possess a photograph of themselves
