Democracy Reloaded Cristina Flesher Fominaya,2020 In *Democracy Reloaded* Cristina Flesher Fominaya tells the story of one of the most influential social movements of recent times Spain's Indignados or 15 M movement that took to the streets of Spain on May 15 2011 with the rallying cry Real Democracy Now We are not commodities in the hands of bankers and politicians Based on access to key participants in the 15 M movement and Podemos and extensive participant observation Flesher Fominaya tells a provocative and original story of this remarkable movement its emergence evolution and impact In so doing she argues that in times of global economic and democratic crisis movements organized around autonomous network logics can build and sustain strong movements in the absence of formal organizations strong professionalized leadership and the ability to attract external resources Further she challenges explanations for success that rest on the mobilizing power of social media Through in depth analysis of the month long occupation of Madrid's Puerta del Sol and subsequent 15 M mobilization *Democracy Reloaded* shows how the experience of the protest camp revitalized pre-existing networks forged bonds of solidarity and gave birth to a new movement that went on to influence public debate and the political agenda in Spain and beyond

In Search of an Ecological Constitution Ezio Costa Cordella,2022-04-15 One of the differentiating factors of our present is the increased environmental awareness However this has not yet been converted into social economic and law systems that reveal the multiple challenges that are imposed on us The destructive impulse of the dominant ideologies in the twentieth century maintains the hegemony of their spaces barely trying to adapt itself into a new reality that surpasses them Meanwhile in 1972 we believed there was a marked environmental degradation in 2022 we recognize that we are in the middle of the sixth mass extinction of the species the earth temperature has already increased in more than one degree Celsius and a significant percent of the planet's sweet water is contaminated If the Constitution that Chile is planning to write and set in force in the years to come wants to capture the logic of our times it is essential that it sets as something basic the environmental conditions where the legal political communities constituted by the Chileans communities are going to develop This book explores the details of the Ecological Constitution concept that refers to the provisions that have to be contained in a Constitution in a transversal way and that setting the environmental protection as a central axis of the social organization attempts to harmonize the social and nature activities The new Constitution of Chile won't change everything but it can constitute a first fundamental base on that change This book is an invitation to dream with that possibility and reflect on the different ways that the Constitution can take us in that direction The systematic changes are urgent and we are in the position to begin with them Ezio Costa Cordella
