**Marine Ecology and Oil Pollution** Jenifer M. Baker,1976 Oil Spill Response in the Marine Environment J.W. Doerffer,2013-10-22 The rapid economic development of many countries since World War II has resulted in a considerable increase in the marine transport of raw materials especially of crude oils and in offshore activities Inevitably

operational discharges from ships ballast and bilge water incidents such as collisions and groundings and offshore exploration of oil and gas lead to a significant amount of oil going into the sea So far understanding of marine environments of oil and its behaviour when released onto the water surface and of the methods and means of response to an oil spill has been rather limited This book introduces the reader to these problems and reflects the levels and trends of development in the field The author has played an active role in combating marine pollution in the international arena since the 1970s and was awarded the International Maritime Prize for 1989 by the International Maritime Organisation

**Fate and Effects of Oil in Marine Ecosystems** J. Kuiper, W.J. van den Brink, 2012-12-06 A Rorsch Member of the TNO Board of Management

Like all living creatures man has from the very outset influenced the environment Initially the traces of human activity were hardly noticeable and so were their effects on the equilibrium of the ecosystem as such However as soon as man learned how to use tools he was able to influence his surroundings more drastically and to proliferate more rapidly As a matter of fact that is the time when things went wrong because a process was started off which was to continue with ever increasing speed and on an ever increasing scale The present condition of nature as a result of the activities of mankind is generally known Whether it is an accident with a nuclear plant or the vanishing of tropical rain forests acid deposition or the pollution of soil water and air environmental disasters almost seem to be the order of the day It is striking that with all these more or less arbitrary examples the provision of energy plays a role In this respect one can add an even more important energy carrier to the list namely crude oil
