corporation firm The new possibilities that this creates for explaining how processes develop and ultimately influence corporate paths are presented in depth Featuring conclusions based on an empirical material that is both rich and exclusive the book also contains extensive non anonymized materials from authentic corporate governance processes A general conclusion is that actions taken by individuals have a special status among those forces as they not only generate impact in themselves but also involve interpretations of the possible effects of all the other forces Among those actions the ones taken by the shareholders stand out as particularly decisive both for the governance processes as such and for how corporations develop over time Offering a degree of openness detail and realism that is hard to find in any other case based study this innovative and enlightening volume is essential for both academics and practitioners involved in corporate governance corporate strategy and the theory of the firm
