Marginal Regions:

Development Issues in Marginal Regions R.B. Singh, 2019-03-04 Rapid population growth demand for increased food resources and other political economic and social stresses have all contributed to building up pressure for development of marginal regions in both developed and developing countries Ecological issues are also adding up to and increasing marginalization of regions and social groups due to the pressure on natural resources Broadly speaking marginal regions are perceived in concepts of centre periphery fringes and boundaries and frontiers In developing countries marginal regions are the combined effects of ecological economic and social factors For understanding the above complex issues the Study Group on Development Issues in Marginal Regions was established in August 1992 at the Washington International Geographical Congress

Societies, Social Inequalities and Marginalization Raghubir Chand, Etienne Nel, Stanko Pelc, 2017-04-04 This book provides an overview of marginality or marginalization as a concept characterizing a situation of impediments social political economic physical and environmental that impact the abilities of many people and societies to improve their human condition It examines a wide range of examples and viewpoints of societies struggling with poverty social inequality and marginalization Though the book will be especially interesting for those looking for insights into the situation and position of ethnic groups living in harsh mountainous conditions in the Himalayan region examples from other parts of the world such as Kyrgyzstan Israel Switzerland and Finland provide an opportunity for comparison of marginality and marginalization from around the world Also addressed are issues such as livelihood outmigration and environmental threats taking into account the conditions scale and perspective of observation Throughout the text particular attention is given to the context and concept of marginalization which sadly remains a persistent reality of human life It is in this context that this book seeks to advance our global understanding of what marginalization is how it is manifested and what causes it while also proposing remedial strategies

Between Global and Local Walter Leimgruber, 2018-01-18 The definitions for marginality and marginal regions are vague and differ between academic disciplines Marginal regions could however be characterized as regions lying off mainstream processes in a sort of vacuum both in society and economy but also in relation to the natural environment and geographical remoteness Illustrated by a wide range of international case studies this book

provides a complete overview of current research into marginality and examines a wide range of possible development options which could offer hope to marginal regions It explores the background to various kinds of marginality describes various types of marginal regions and discusses possible solutions for political economic and socio cultural actors to fight the ongoing processes of marginalization Marginality and marginal regions are looked at from a wide perspective and are seen as being in part the outcome of globalization and deregulation The book not only discusses practical policy options but also considers marginality in its relation to ethics and spirituality *Development Issues in Marginal Regions II* International Geographical Union.
