Manufacturing Human Bombs:

Manufacturing Human Bombs Mohammed M. Hafez, 2006 Suicide bombings have become a terrifyingly familiar feature of contemporary warfare and insurgency But explanations of such attacks are typically either too narrow or too superficial to enable us to understand and thus combat this complex and deadly phenomenon In this slim but remarkably balanced informative and insightful volume Mohammed Hafez delves beneath the surface as he explores the case of Palestinian suicide bombers during the al Aqsa intifada that began in 2000 Drawing on extensive research in the West Bank and Israel Hafez reveals an intricate web of factors that fueled the campaign of suicide attacks To understand the bombings he argues we must examine the interrelation among the motives of the individual martyrs the calculations of the organizations that deployed them and the attitudes of a victimized society This approach yields not only a penetrating look at suicide bombers but also policy relevant lessons for dealing with extreme political violence in places such as Iraq Chechnya and Afghanistan Highly readable wonderfully concise and packed with useful information **Manufacturing Human Bombs** offers students an excellent introduction to its subject for readers already well versed in terrorism and the Middle East the volume offers a rare combination of rich empirical data considerable analytical breadth and depth and refreshing evenhandedness

Suicide Bombings Riaz Hassan, In an age when the Western world is preoccupied with worries about weapons of mass destruction in terrorist hands terrorists in many parts of the world are using a more basic device as a weapon life itself Through analysis of data from The Suicide Terrorism Database **Suicide Bombings** seeks to explain the motivation of these attackers and uncovers a cocktail of forces that drive suicide bombers

The Business of Martyrdom Jeffrey W Lewis, 2012-04-15 *The Business of Martyrdom* is the only comprehensive history of suicide bombing from its origins in Imperial Russia to the present day It makes use of a framework from the history and philosophy of technology to explain the diffusion and evolution of suicide bombing over the past several decades It is primarily a work of synthesis meant to reach a broad audience and endeavors to integrate as much of the recent scholarly literature as possible including reconciling explanatory mechanisms that seem to be at odds with one another In addition this book is able to draw on very recent changes in suicide bombing in the years 2008 2010 that allow it to have a slightly different perspective than earlier studies For the first time the global number of suicide attacks has declined significantly for three years in a row This book therefore has the advantage of addressing the phenomenon of suicide bombing as a bounded phenomenon with limits to its growth and diffusion To this point the impression that suicide bombers are the smartest bombs yet created has been widespread but confined to the area of metaphor Drawing well established ideas from the history of technology *The Business of Martyrdom* argues that the metaphor should be taken literally Suicide bombing is a technology that has been invented and re invented at different times in different areas but always for the same purpose resolving a mismatch in military capabilities between antagonists by utilizing the available cultural and human resources Over the past several years analysts have

produced a large number of monographs and articles examining suicide bombing. The best contributions in this new and growing literature have shed considerable light on the complexity of suicide bombing in practice, particularly regarding the structure of the organizations that deploy suicide bombers and the relationships between these organizations and the recruits whom they utilize in their attacks. Nevertheless, nagging inconsistencies and questions remain. These inconsistencies can be explained by examining suicide bombing as a technological system that integrates human beings, cultures, and devices and directs them toward specific ends. Such an analysis requires that neither the individual bombers nor their sponsoring organizations be the basic unit of discussion. Instead, the bombers must be understood as components within a much larger system that has been shaped by a host of social, cultural, and operational constraints throughout its existence. Integrating insights from the historical analysis of other technological systems with the recent literature specifically devoted to suicide bombing therefore allows *The Business of Martyrdom* to develop a fuller understanding of suicide bombing as a unified yet diverse phenomenon.

Tangled Roots Jeffrey Ivan Victoroff, 2006. What do we really know about the contributing causes of terrorism? Are all forms of terrorism created equal, or are there important differences in terrorisms that one must know about to customize effective counter strategies? Does poverty cause terrorism? This book talks about the basic human ingredients that combust to produce violent extremism.

Terrorism, Political Violence, and Extremism Chris E. Stout Ph.D., 2017-05-24. A must read for psychologists, clinical and academic alike, as well as for political scientists, policy analysts, and others working in the realm of terrorism, political violence, and extremism, this book carefully explores the theories, observations, and approaches of authorities in the field and addresses how and why terrorism has perpetuated for so long. Terrorism is now a regular topic in the news, rather than a rare or an unusual occurrence. The possibility of violent terrorist acts constitutes a legitimate safety concern, regardless of one's country of residence; no longer can anyone assume that their location is beyond the reach or outside the targeted areas of any number of terrorist groups.

Terrorism, Political Violence, and Extremism: New Psychology to Understand, Face, and Defuse the Threat examines why the number of terrorist attacks has greatly increased since the attacks on September 11, 2001, including well-known events such as the Madrid train bombings (2004), the London Underground bombings (2005), the San Bernardino and Paris attacks (2015), and countless others, particularly in the Middle East and Africa. Beyond providing a careful and up-to-date assessment of the state of terrorism worldwide, which includes coverage of the religious and political origins of terrorist activities, the book pinpoints less recognized and rarely studied aspects of terrorism, such as terrorism hysteria, sexuality, shame, and rape. The diverse perspectives within this unified volume are relevant to a breadth of subject areas, such as international psychology, military psychology, political science, political theory, religious studies, military theory, peace studies, military sciences, law enforcement, public health, sociology, anthropology, social work, law, and feminist theory.

Naming Evil, Judging Evil Ruth W. Grant, 2008-09-15. Is it more dangerous to call something evil or not to? This fundamental question deeply divides those who fear that the term oversimplifies grave problems.

and those who worry that to effectively address such issues as terrorism and genocide we must first acknowledge them as evil Recognizing that the way we approach this dilemma can significantly affect both the harm we suffer and the suffering we inflict a distinguished group of contributors engages in the debate with this series of timely and original essays Drawing on Western conceptions of evil from the Middle Ages to the present these pieces demonstrate that while it may not be possible to definitively settle moral questions we are still able and in fact are obligated to make moral arguments and judgments Using a wide variety of approaches the authors raise tough questions Why is so much evil perpetrated in the name of good Could evil ever be eradicated How can liberal democratic politics help us strike a balance between the need to pass judgment and the need to remain tolerant Their insightful answers exemplify how the sometimes rarefied worlds of political theory philosophy theology and history can illuminate pressing contemporary concerns

The Mind of the Terrorist Jerrold M. Post, 2007-12-10 In contrast to the widely held assumption that terrorists as crazed fanatics Jerrold Post demonstrates they are psychologically normal and that hatred has been bred in the bone He reveals the powerful motivations that drive these ordinary people to such extraordinary evil by exploring the different types of terrorists from national separatists like the Irish Republican Army to social revolutionary terrorists like the Shining Path as well as religious extremists like al Qaeda and Aum Shinrikyo In *The Mind of the Terrorist* Post uses his expertise to explain how the terrorist mind works and how this information can help us to combat terrorism more effectively

Stress of War, Conflict and Disaster George Fink, 2010-11-25 Stress is a universal phenomenon that impacts adversely on most people Following on the heels of *Stress Science Neuroendocrinology and Stress Consequences Mental Neuropsychological and Socioeconomic* this third derivative volume will provide a readily accessible and affordable compendium that explains the phenomenon of stress as it relates physically and mentally to war conflict and disaster The first section will be dedicated to study of the link between stress and various forms of conflict Specific instances of conflict will be discussed the Gulf wars Korea Hiroshima bombing the Holocaust 9 11 Northern Ireland terrorism in general torture The second section will explore the stress impact of more general physical disasters such as airline and vehicle accidents earthquakes floods and hurricanes The final section will focus on the clinical relationship between conflict stress and various mental diseases PTSD suicide disaster syndrome etc as well as the adverse impact of stress on human physical health in general Comprised of about 100 top articles selected from Elsevier's *Encyclopedias of Stress* the volume will provide a valuable desk reference that will put relevant articles readily at the fingertips of all scientists who consider stress Chapters offer impressive and unique scope with topics addressing the relationship between stress generated by war conflict and disaster and various physical mental disorders Richly illustrated with over 200 figures dozens in color Articles carefully selected by one of the world's most preeminent stress researchers and contributors represent the most outstanding scholarship in the field with each chapter providing fully vetted and reliable expert knowledge

The Making of Pakistani Human Bombs Khuram Iqbal, 2015 Based on interviews with failed suicide

bombers officials of Pakistani law enforcement agencies involved in interrogating high profile self immolation attacks and content analysis of Jihadi publications produced in local languages this book offers the first empirically grounded analysis of suicide terrorism in Pakistan

The Making of a Human Bomb Nasser Abufarha,2009-07-24 Claims that there is a cultural logic to Palestinian suicide bombings and that these acts can neither be understood nor effectively countered without taking this into account

The Making of a Terrorist: Recruitment James J. F. Forest,2006 Global terrorism has become a frightening reality The situation calls for greater engagement with the public as the necessary eyes and ears of the global anti terrorism coalition However to be effective the public must be equipped with the knowledge of how why and where an individual becomes a terrorist This is the primary goal of this set which seeks to answer one central question What do we currently know about the transformation through which an individual becomes a terrorist

Factory and Industrial Management John Robertson Dunlap,Arthur Van Vliissingen,John M. Carmody,1915 *The Making of the Atom Bomb* Victoria Sherrow,2000 Discusses various topics connected to the production of the atom bomb including the development of nuclear energy work on atomic weapons at the Los Alamos and other sites and the decision to use the first atomic bomb during World War II *Social Forces* ,2006 *Journal of Palestine Studies* ,2006 *Making Terrorism History* Scilla Elworthy,Gabrielle Rifkind,2006 Ever since 9 11 it s been clear that we need a new way to deal with terrorism In this important new book two experts explain the root causes of terrorism the links between trauma and fundamentalism why people become suicide bombers why peace processes collapse whether non violence is a useful response and what can be done Clear far reaching and extremely persuasive their book shows why political violence is now a major force in our world At the same time it offers a range of practical actions that can be taken to combat it not only by our governments but also on the ground in Iraq Israel Palestine and more widely In addition it highlights the many simple but effective steps that we too can take within our local communities to make peace not war on terror

International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences ,2006 *The Making of a Terrorist: Root causes* James J. F. Forest,2006 Global terrorism has become a frightening reality The situation calls for greater engagement with the public as the necessary eyes and ears of the global anti terrorism coalition However to be effective the public must be equipped with the knowledge of how why and where an individual becomes a terrorist This is the primary goal of this set which seeks to answer one central question What do we currently know about the transformation through which an individual becomes a terrorist

Terrorism's Unanswered Questions Adam B. Lowther,Beverly Lindsay,2009 In the wake of the September 11 2001 attacks on the United States terrorism became a topic for the masses to explore rather than the hidden purview of analysts and scholars tucked away at the CIA or in the ivory tower Now more than five years later there remains much to be discovered about terrorism and its causes This volume takes a look at some of terrorism s unanswered questions How do we define terrorism What threat does the United States face from weapons of

mass destruction Why has international law failed to stop terrorism These are but three of the questions addressed in this volume Book Jacket
