Erosion of Reality by Spatialisation and Digitalisation Pieter Brabers, 2022-08 This book offers an innovative view of everyday reality It clarifies how the spatial

dimension of reality as well as our personal and inter personal perception and interaction with reality aggravates human separateness at the expense of human connectedness It shows how many urgent societal challenges are affected by an imbalance between spatial and the non spatial aspects and offers an analysis of the impoverishment of society both in spatial terms spatialisation and in informational terms digitalisation Drawing on insights from quantum physics and depth psychology it proposes an unorthodox view of the potential of humans and of reality in itself that was lost in this impoverishment I found this book hugely interesting highly original and very well written I haven t come across these ideas presented in quite this way and so the book could be considered a groundbreaking contribution Dr Stephan Harding Resident Ecologist Schumacher College Author of *Animate Earth* It rarely happens that we are invited by a scholarly text to look at reality in a basically different way than the one we are used to at least in a way that is seductive and compelling at the same time But this is precisely what the text of Pieter Brabers has done with me Dr John Rijsman Emeritus Professor of Social Psychology Tilburg University
