for European history It examines inter al how mapping and military technology advanced in tandem how modern states territories were mapped and borders drawn up the role of maps in shaping the urban environment and cartography s links to the new sciences

Maps and Mapmakers of the Civil War Earl B. McElfresh,1999-10 During the Civil War a good map could spell the difference between victory and defeat This book collects the war s most notable interesting and beautiful maps and tells the story of how they were made Ranging from exquisitely detailed renderings reproduced in full color to rough pencil sketches drawn from horseback these maps are both striking works of art and invaluable historical artifacts The anecdotal text explains the techniques and travails of mapmaking during the war and reveals the little known cartographic exploits of George Armstrong Custer writer Ambrose Bierce and Brooklyn Bridge engineer Washington Roebling among many others

Mapping Time and Space Evelyn Edson,1999 Until recently medieval maps were often looked upon as quaint amusing and quite simply wrong By comparison the best examples of modern cartography appear to offer a much more accurate record of the world However as Professor Edson makes clear in this stimulating book when seeking the meaning and purpose of maps in the Middle Ages one cannot assume that they were used for the same purposes or had the same meaning as they do today In fact the differences in structure and content give us an intriguing insight into how medieval mapmakers and readers saw their world By a close study of the context in which the mapmakers produced their work it can be shown that they were often striving to present and make sense of a world picture that naturally incorporated key events from the past at the same time showing a narrative of human spiritual development from the Creation to the Last Judgment From publisher s description

How to Lie with Maps Mark Monmonier,2018-04-13 An updated edition of the humorous informative and perceptive guide to how maps can lead us astray Toronto Globe and Mail An instant classic when first published in 1991 How to Lie with Maps revealed how the choices mapmakers make consciously or unconsciously mean that every map inevitably presents only one of many possible stories about the places it depicts The principles Mark Monmonier outlined back then remain true today despite significant technological changes in the making and use of maps The introduction and spread of digital maps and mapping software however have added new wrinkles to the ever evolving landscape of modern mapmaking Fully updated for the digital age this new edition of How to Lie with Maps examines the myriad ways that technology offers new opportunities for cartographic mischief deception and propaganda While retaining the same brevity range and humor as its predecessors this third edition includes significant updates throughout as well as new chapters on image maps prohibitive cartography and online maps It also includes an expanded section of color images and an updated list of sources for further reading Praise for previous editions of How to Lie with Maps Will leave you much better defended against cheap atlases

Nurminen,2015 *The Mapmakers World* illuminates the cultural history of European world maps what do historical world maps tell of us of our perception of the world and of places and peoples that are foreign to us For what purposes were they used The answers to these and other questions open up a fascinating narrative of discovery and cartography **The Maps and Map-makers of Maryland** Edward Bennett Mathews,1898
