

TOEFL Academic Writing Task Sample Question

Task 2: Writing for an Academic Discussion

Task 2

Wahid

My class, we are exploring the impact of technology on education. Some believe that technology, such as online learning platforms and digital resources, enhances the educational experience. Others argue that it can be a distraction and a lack of personal interaction. What's your view on the role of technology in education? Should it be embraced or approached with caution?

Lynne

While technology offers significant benefits in education, I believe it should be approached with caution. For instance, students often find it difficult to compete when studying online due to the distractions of social media and other apps. Moreover, the absence of face-to-face interaction can hinder the development of important social skills that are cultivated in traditional classroom settings. Therefore, while technology can enhance learning, it should not replace conventional educational methods.

Angel

I argue that technology should be embraced in education because it opens up numerous opportunities for learning. Online platforms provide access to a wealth of resources and allow students to learn at their own pace. For example, many students benefit from video tutorials that explain complex concepts more clearly than a teacher's lecture. Additionally, technology can connect learners from different parts of the world, fostering diverse perspectives and collaboration. Embracing technology in education can lead to a more inclusive and effective learning environment.

Your professor is teaching a class on the role of technology in education.

In your response, you should do the following.

- Express and support your opinion.
- Make a contribution to the discussion as you see need.

An effective response will contain at least 100 words.
