Morphosis Connected Isolation:

Morphosis ,1993 **Morphosis** Thom Mayne,1993 With writings by Thom Mayne this monograph illustrates a selection of projects many presented for the first time from this LA based group whose work stands as a response to the context and diversity of the urban environment The book gives an insight into the work of this firm covering the earlier works such as the Venice III houses to the recently completed Crawford house and Salick Healthcare building as well as the Higashi Nara and Chiba projects in Japan **Morphosis** ,1993 **Morphosis** ,1993 **The Force of the Virtual** Peter Gaffney,2013-11-30 The Force of the Virtual explores the problematic relationship between the philosophy of Gilles Deleuze and science The original essays gathered here examine how science functions in respect to Deleuze s concepts of time and space how science accounts for processes of qualitative change how science actively participates in the production of subjectivity and how Deleuze s thinking engages neuroscience *Site and Composition* Enis Aldallal,Husam AlWaer,Soumyen Bandyopadhyay,2016-06-10 *Site and Composition* examines design strategies and tactics in site making It is concerned with the need for a renewed understanding of the site in the twenty first century and the need for a critical position regarding the continued tendency to view the site as an isolated fragment severed from its wider context The book argues revisiting the traditional instruments or means of both siting and composition in Architecture to explore their true potential in achieving connections between site and context Through the various examples studied here it is suggested that such instrumental means have the potential for achieving greater poetic outcomes The book focuses on the works of twentieth century architects of wide ranging persuasion Peter Eisenman Le Corbusier Frank Lloyd Wright Alvaro Siza Herzog and de Meuron and Charles Correa for example who have strived in quite different ways to achieve deeper engagement with the physical qualities of place and context Departing from a reconsideration of the fragment *Site and Composition* emphasises the role of the positive fragment in achieving both historical continuity and renewed wholeness The potential of both planimetric and sectional compositional methods are explored emphasising the importance of reciprocity between inside and outside between fragment and the whole as well as materiality Written in a clear and accessible manner this book makes vital reading for both researchers and students of architecture and urbanism **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott,2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclope dia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries
