Neal,1981 [Art and Society in Fourth-century Britain](#) Sarah Scott,2000 This volume builds upon the copious and varied research on villa mosaics in Roman

Britain and evaluates it within the context of elite social life in the 4th century AD. It argues that the mosaics were an integral part of the rich lifestyle of the elite in this period and played an important role in defining their status. Yet these symbols of power were apparently no longer valued to the same degree by the end of the 4th century. In a period of increasing social and economic instability, the mosaics were one element in an elite lifestyle which was ultimately to prove socially divisive. In this wide-ranging study, Scott considers the significance and long-term impact of the artistic choices made by villa owners.

Roman Mosaics of Britain: Western Britain David S. Neal, Stephen R. Cosh, 2002. This volume brings to a triumphant conclusion this monumental project to catalogue, describe and illustrate every Romano-British mosaic. The area covered by the fourth and final volume in the corpus is one of the richest regions of Britain in economic as well as architectural and artistic terms and this is reflected in the quantity and quality of the region's mosaics, which include the largest figured mosaic ever found in Britain, the Woodchester Orpheus pavement, which was perhaps the inspiration for the other famous Orpheus mosaics of the Roman Cotswolds. At the heart of this affluent region is Cirencester, Roman Britain's second largest town, represented here by more than sixty mosaics, the second-century examples being the most exquisite in the country. There are also many fine mosaics from the region's highly ornate villas as well as from the towns of Gloucester, Caerwent and Wroxeter. The catalogue follows the format of earlier volumes in providing an account of each mosaic's discovery and locating the mosaic within its building plan. Following the description are notable parallels and major references. Many of the illustrations are by the authors, with additional ones by Luigi Thompson, as well as photographs and historical engravings, a high proportion of the latter by Samuel Lysons, whose home was in Gloucestershire, where he did much of his pioneering work in archaeological excavation and illustration. Brief biographies of Lysons and all the other artists whose work graces all four volumes appear at the end of this volume. As with previous volumes, the work is preceded with a substantial introduction. This deals with the history and topography of the region, buildings and rooms, an assessment of regional workshops and schemes, ending with a consideration of mosaics in relation to the end of Roman Britain.

Romano-British Mosaics Peter Johnson, 1982. *Proceedings of the British Academy*, British Academy, 1905. **A Mosaic Menagerie** Patricia Witts, 2016. Over 700 creatures of land, sea and sky have been recorded from at least 140 Romano-British mosaics. This comprehensively illustrated book is the first detailed study of them. It identifies and discusses the animals, assesses their role in floor decoration and explains how they were much more than appealing decoration.

Preservation Or Display? Michael Dawson, 2012. **Romano-British Mosaic Pavements** Thomas Morgan, 1886. **The Culture of the English People** N. J. G. Pounds, 1994-05-27. This wide-ranging book, first published in 1994, traces the development of popular culture in England from the Iron Age to the eighteenth century.
