Puns And Dens Discovering Learning Needs In General Practice Radcliffe Professional Development Series:

Practice Professional Development Planning Peter Wilcock, Charles Champion-Smith, Sue Elston, 2003 Written for GPs and practice staff that have a responsibility for leading and facilitating practice professional development plans PPDPs this book is a practical guide that outlines the steps key elements and learning principles for developing PPDPs within the work setting

I Don't Know What It Is But I Don't Think It's Serious Tim Crossley, 2008-09-01 I Don't Know What It Is but I Don't Think It's Serious provides a broad analysis of the issues behind medical confidence and decision making It looks at how the GP role is seen and the status that backs it and explores the issues patients and others bring to the consultation The book also covers practical communication skills around the issue of uncertainty such as teasing out reasons for attendance and reassurance techniques sharing the burden with patients dealing with things that have gone wrong using the same skills we acquire for good consulting to become better organised and more effective informing our personal development plans The book does not solve all a GP's problems It seeks to understand the ones that undermine us and help us to cope to enjoy and to look forward to the uncertainty of whatever is going to happen tomorrow The book supports the need for using communication skills training as the basis for both registrar and ongoing medical education trying to make these seem solutions rather than problems All chapters are lightly referenced and have a conclusion with anecdotal text boxes peppered amongst the text to ease the strain of reading

Essential Values-Based Practice K. W. M. Fulford, Ed Peile, Heidi Carroll, 2012-03-01 This book will help clinicians acquire and develop the processes and skills of values based practice The aim of most patient clinician consultations is to improve health outcomes Often they succeed and patients are satisfied and empowered However some consultations are unsatisfactory and result in failure to improve health outcomes and dissatisfaction on the part of patients carers or clinicians When consultations fail to achieve the desired results the cause is not usually a failure of evidence based practice Today's clinicians are trained in evidence based medicine educated updated and appraised The most likely reason why things go wrong is a failure of values based practice not ascertaining the relevant values perspectives and acting on them in a coherent and purposeful manner If you rehearse and practise the elements of values based practice detailed in this book you will find your consultations more personally rewarding and your patients are likely to derive more benefit
