Birds of the Salton Sea Michael Patten, Guy McCaskie, Philip Unitt, 2003-08-19 The Salton Sea California's largest inland lake supports a spectacular bird population that is among the most concentrated and most diverse in the world. Sadly this crucial stopover along the Pacific Flyway for migratory and wintering shorebirds, landbirds, and waterfowl is dangerously close to collapse from several environmental threats. This book is the first thoroughly detailed book to describe the birds of Salton Sea: more than 450 species and subspecies in all. A major contribution to our knowledge about the birds of western North America, it will also be an important tool in the struggle to save this highly endangered area. Synthesizing data from many sources, including observations from their long-term work in the area, the authors' species accounts discuss each bird's abundance, seasonal status, movement patterns, biogeographic affinities, habitat associations, and more. This valuable reference also includes general information on the region's fascinating history and biogeography, making it an unparalleled resource for the birding community, for wildlife managers, and for conservation biologists concerned with one of the most threatened ecosystems in western North America.

Birth of the Inland Sea Ellen Lloyd Trover, 2018-12-28 Based on early Twentieth Century accounts, *Birth of the Inland Sea* explains how the Salton Sea came to be. With 105 early photographs and maps plus 27 modern photographs and a map of the Sea, the book graphically sets the background for today's news that the Sea is rapidly shrinking.

Haven Or Hazard Michael J. Cohen, 1999 [Salton Sea Restoration Project](#), 2000

The Salton Sea Douglas A. Barnum, John F. Elder, Doyle Stephens, Milton Friend, 2013-03-09 For the first time, an effort to conduct coordinated interdisciplinary research on a vast and complex saline lake has been undertaken for the purposes of providing baseline data to guide restoration project activities. This volume compiles state-of-the-art science for the Salton Sea and will serve as the foundation for the next several generations of scientific inquiry for California's largest lake. The science presented here reveals the Salton Sea to be one of the most productive fisheries in the world, details why the Salton Sea is important to migratory and wintering birds, investigates the microbial world, and reports numerous taxa new to science and documents chemical and physical interactions which make this inland saline lake function. This book is intended for specialists in saline lake research who are interested in all aspects of saline lake ecology.

Greetings from the Salton Sea Kim Stringfellow, 2005 The Salton Sea is a man-made catastrophe redolent with the smell of algae and decomposing fish. Nevertheless, the lake's vast placid expanses continue to attract birdwatchers, tourists, and artists. In *Greetings from the Salton Sea*, photographer Kim Stringfellow explores the history of California's largest lake from its disastrous beginnings: the sea was formed when Colorado River levees broke and spilled into a depression 280 feet below sea level to its heyday as a desert paradise in the 1950s and its current state as an environmental battleground. Like the 400 plus species of birds that use the lake as a halfway point in their annual migration, developers flocked to the water too: they planted palm trees, built golf courses, and hired showstoppers such as the Beach Boys to perform at area resorts. These days, politicians seek to

redirect the lake's only source of replenishment agricultural runoff from surrounding farms to water golf courses and green lawns elsewhere Greetings from the Salton Sea's photographs capture the war among policymakers environmentalists developers and the individuals still living along the lake's shores As Stringfellow aptly documents it is a war for water and ultimately for existence [Geothermal Energy Update](#) ,1978-12 *Hydrologic Regimen of Salton Sea, California* Allen Grant Hely, Gilbert H. Hughes, G. H. Hughes, Burdge Ireland, 1966 A study of the variations in water level and water quality and their causes **The Salton Sea** Karl Anderson, 2011 The Salton Sea was an accident of man created when heavy rainfall caused the Rio Colorado to swell and breach an Imperial Valley dike in 1905 For two years water flowed into the Salton Sink and ancient Lake Cahuilla Today the sea is 227 feet below sea level covers approximately 376 square miles and is California's largest lake During the early 1900s it became an important bird and waterfowl refuge When many species of fish were introduced the Salton Sea also became popular for boating fishing hunting and camping activities Motels yacht clubs and marinas developed around Salton City and North Shore During recent decades the sea has become polluted from agricultural runoff creating a doubtful future for the Salton Sea However it remains a sanctuary for anyone who enjoys bird watching desert landscapes or beautiful farmlands [Salton Sea](#) ,
