**Privacy in Statistical Databases** Josep Domingo-Ferrer, Emmanouil Magkos, 2010-09-14 Privacy in statistical databases is a discipline whose purpose is to provide a solution to the tension between the social political economic and corporate demand for accurate information and the legal and ethical obligation to protect the privacy of the various parties involved Those parties are the respondents the individuals and enterprises to which the database records refer the data owners those organizations spending money in data collection and the users the ones querying the database or the search engine who would like their queries to stay confidential Beyond law and ethics there are also practical reasons for data collecting agencies and corporations to invest in respondent privacy if individual respondents feel their privacy guaranteed they are likely to provide more accurate responses Data owner privacy is primarily motivated by practical considerations if an enterprise collects data at its own expense it may wish to minimize leakage of those data to other

enterprises even to those with whom joint data exploitation is planned Finally user privacy results in increased user satisfaction even if it may curtail the ability of the database owner to provide users

There are at least two traditions in statistical database privacy both of which started in the 1970s the first one stems from official statistics where the discipline is also known as statistical disclosure control (SDC) and the second one originates from computer science and database technology In official statistics the basic concern is respondent privacy In computer science the initial motivation was also respondent privacy but from 2000 onwards growing attention has been devoted to owner privacy privacy preserving data mining and user privacy private information retrieval

**Privacy in Statistical Databases** Josep Domingo-Ferrer, Francisco Montes, 2018-09-07 This book constitutes the refereed proceedings of the International Conference on Privacy in Statistical Databases PSD 2018 held in Valencia Spain in September 2018 under the sponsorship of the UNESCO Chair in Data Privacy The 23 revised full papers presented were carefully reviewed and selected from 42 submissions The papers are organized into the following topics tabular data protection synthetic data microdata and big data masking record linkage and spatial and mobility data Chapter SwapMob Swapping Trajectories for Mobility Anonymization is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](http://springer.com)

**Privacy in Statistical Databases**, 2010 **Inference Control in Statistical Databases** Josep Domingo-Ferrer, 2002-04-17 Inference control in statistical databases also known as statistical disclosure limitation or statistical confidentiality is about finding tradeoffs to the tension between the increasing societal need for accurate statistical data and the legal and ethical obligation to protect privacy of individuals and enterprises which are the source of data for producing statistics Techniques used by intruders to make inferences compromising privacy increasingly draw on data mining record linkage knowledge discovery and data analysis and thus statistical inference control becomes an integral part

of computer science This coherent state of the art survey presents some of the most recent work in the field The papers presented together with an introduction are organized in topical sections on tabular data protection microdata protection and software and user case studies *Security of Statistical Databases* Michael A. Palley,19?? *Security, Privacy, and Trust in Modern Data Management* Milan Petkovic,Willem Jonker,2007-06-12 The vision of ubiquitous computing and ambient intelligence describes a world of technology which is present anywhere anytime in the form of smart sensible devices that communicate with each other and provide personalized services However open interconnected systems are much more vulnerable to attacks and unauthorized data access In the context of this threat this book provides a comprehensive guide to security and privacy and trust in data management
