Scandalous Knowledge Science Truth And The Human:

Scandalous Knowledge Barbara Herrnstein Smith, 2006 Throughout the recent culture and science wars the radically new conceptions of knowledge and science emerging from such fields as the history and sociology of science have been denounced by various journalists scientists and academics as irresponsible attacks on science absurd denials of objective reality or a cynical abandonment of truth itself In *Scandalous Knowledge* Barbara Herrnstein Smith explores and illuminates the intellectual contexts of these crude denunciations A preeminent scholar theorist and analyst of intellectual history Smith begins by looking closely at the epistemological developments at issue She presents a clear historically informed and philosophically sophisticated overview of important twentieth century critiques of traditional rationalist realist positivist accounts of human knowledge and scientific truth and discusses in detail the alternative accounts produced by Ludwik Fleck Thomas Kuhn Michel Foucault Bruno Latour and others With keen wit Smith demonstrates that the familiar charges involved in these scandals including the recurrent invocation of postmodern relativism protect intellectual orthodoxy by falsely associating important intellectual developments with logically absurd and morally or politically disabling positions She goes on to offer bold original and insightful perspectives on the currently strained relations between the natural sciences and the humanities on the grandiose but dubious claims of evolutionary psychology to explain human behavior cognition and culture and on contemporary controversies over the psychology biology and ethics of animal human relations *Scandalous Knowledge* is a provocative and compelling intervention into controversies that continue to roil through journalism pulpits laboratories and classrooms throughout the United States and Europe

Scandalous Knowledge Barbara Herrnstein Smith, 2005 In this text the author explores the radical reconceptions of knowledge and science emerging from constructivist epistemology social studies of science and contemporary cognitive science

Science and Religion Thomas Dixon, Geoffrey Cantor, Stephen Pumfrey, 2010-04-01 The idea of an inevitable conflict between science and religion was decisively challenged by John Hedley Brooke in his classic *Science and Religion Some Historical Perspectives* Cambridge 1991 Almost two decades on *Science and Religion New Historical Perspectives* revisits this argument and asks how historians can now impose order on the complex and contingent histories of religious engagements with science Bringing together leading scholars this volume explores the history and changing meanings of the categories science and religion the role of publishing and education in forging and spreading ideas the connection between knowledge power and intellectual imperialism and the reasons for the confrontation between evolution and creationism among American Christians and in the Islamic world A major contribution to the historiography of science and religion this book makes the most recent scholarship on this much misunderstood debate widely accessible

Infowhelm Heather Houser, 2020-06-16 How do artists and writers engage with environmental knowledge in the face of overwhelming information about catastrophe What kinds of knowledge do the arts produce when addressing climate change extinction and other environmental emergencies What happens to scientific data

when it becomes art In Infowhelm Heather Houser explores the ways contemporary art manages environmental knowledge in an age of climate crisis and information overload Houser argues that the infowhelm a state of abundant yet contested scientific information is an unexpectedly resonant resource for environmental artists seeking to go beyond communicating stories about crises Infowhelm analyzes how artists transform the techniques of the sciences into aesthetic material repurposing data on everything from butterfly migration to oil spills and experimenting with data collection classification and remote sensing Houser traces how artists ranging from novelist Barbara Kingsolver to digital memorialist Maya Lin rework knowledge traditions native to the sciences entangling data with embodiment quantification with speculation precision with ambiguity and observation with feeling Their works provide new ways of understanding environmental change while also questioning traditional distinctions between types of knowledge Bridging the environmental humanities digital media studies and science and technology studies this timely book reveals the importance of artistic medium and form to understanding environmental issues and challenges our assumptions about how people arrive at and respond to environmental knowledge

The Human Side of Engineering John Heywood,2022-05-31 While in many university courses attention is given to the human side as opposed to the technical side of engineering it is by and large an afterthought Engineering is however a technical social and personal activity Several studies show that engineering is a community activity of professionals in which communication is central to the engineering task Increasingly technology impacts everyone in society Acting as a professional community engineers have an awesome power to influence society but they can only act for the common good if they understand the nature of our society To achieve such understanding they have to understand themselves This book is about understanding ourselves in order to understand others and understanding others in order to understand ourselves in the context of engineering and the society it serves To achieve this understanding this book takes the reader on 12 intellectual journeys that frame the big questions confronting the engineering professions

Sociology as a Human Science Isaac Ariail Reed,2023-04-25 Sociology as a Human Science is a set of foundational wide ranging and updated essays from Isaac Ariail Reed Gathered together for the first time with a new introduction they articulate a distinct perspective on concept and method in social science Reed writes about realism and positivism postmodernism and empiricism mechanisms and causality and power and history developing thereby an understanding of the key debates out of which 21st century sociology has developed Carefully considering all manner of arguments in metatheory and epistemology and moving towards a program of interpretive explanation focused on culture and power Reed places sociology at the center of debates about knowledge production across the humanities and social sciences His reconstructive approach positioned after the posts poststructuralism postmodernism and postcolonialism provides a way for interpretive sociology to provide analytically sound theoretically extensive and empirically rich understandings of social life
