The Technique and Practice of Psychoanalysis, Volume II Ralph R. Greenson, 1992 The exciting discovery of several incomplete chapters of Ralph R Greenson's long awaited Volume II of The Technique and Practice of Psychoanalysis form the cornerstone of this memorial to a man considered by many to be the best clinical psychoanalyst of

his generation Using the detailed outlines of the chapters that Greenson had intended to write the editors have solicited prominent American psychoanalysts to cover the planned content areas Such adherence to Greenson s plan makes this a worthy companion to Volume I One of the most important contributions of Volume I was its elucidation of the clinical implications of the structural model The contributors to Volume II continue this theoretical heritage as they use the advances in theory of technique to expand on the areas Greenson deemed important The interpretative process for example is examined in detail So are the issues of suitability and the technical problems posed by acting out and by countertransference The analytic process is examined with particular emphases on working through dream interpretation and the termination phase Other areas deemed important by the editors also receive emphasis these include the goals of psychoanalysis and analytic work with sicker patients In keeping with Greenson s interest in the clinical encounter this book is a teaching volume for practicing clinicians A consistent clinical emphasis with the use of vignettes or lengthier case examples maintains a clinical focus that will make this volume invaluable for both the student as well as the experienced psychoanalyst Sufficient clinical examples are provided to allow for the easy commerce between theory and technique that made Volume I so valuable

Psychoanalytic Practice Helmut Thomä, Horst Kächele, 2012-12-06 A basic issue for all those essaying to write comprehensive texts on the nature of psychoanalysis whether oriented primarily to the exposition of the theory or of the technique of psychoanalysis within the American literature the books by Brenner and by Greenson come to mind as exemplars of the two categories is that of the relationship of the theory to the technique and the practice This issue is however not always brought into explicit focus in this literature and thereby its problematic nature as a fundamental and not yet satisfactorily re solved dilemma of our discipline is often glossed over or even by passed completely as if we could comfortably assume that Freud had uniquely in the world s intellectual history fully succeeded in creating a science and a discipline in which the theory the understanding and the therapy i e the cure were inherently together and truly the same but two sides of the same coin
