**The Real Space Cowboys** , *The Real Space Cowboys* Ed Buckbee, Wally Schirra, 2005 In 1959 seven U S military fighter pilots were selected to train as America s first astronauts Alan Shepard Gordon Cooper Gus Grissom John Glenn Scott Carpenter Wally Schirra and Deke Slayton would become known as the Mercury Seven M7 These men who had jockeyed for the best flying jobs in the military began competing for rides on rockets Most would eventually vie for the ultimate ride to the moon The author Ed Buckbee who has enjoyed a 40 year association with the U S manned space flight program follows these brave men who pioneered the U S space program Through time and personal friendships he captures dreams of flying higher faster and farther than any one in the known universe Readers are invited behind the scenes to witness the competition between chimpanzees and astronauts and the conflict between NASA engineers designing capsules and those who would pilot them Through this book readers feel the collective will of a nation to defeat the Russians in an all out space race via an American team of 400 000 engineers technicians astronauts and support personnel who performed as if the country were at war The eras of Mercury Gemini and Apollo these were times of nobility and humility but also times of arrogance tension and from time to time humour Gotcha s were commonplace astronaut pranks and a dubious answer to the question Are you a turtle resulted in a healthy bar tab But what of our first space heroes after the Apollo program was completed Accepting the call of Project Mercury meant a lifetime commitment Their work continued with motivational programs for youth through the U S Space Camp programs public programs at institutions such as the Smithsonian s National Air and Space Museum the U S Space 30th Anniversary Documentary on Skylab Gotcha film about Alan Shepard Space Camp Documentary Reach For The Stars 1997 Panel Discussion at Pensacola with Armstrong Shepard Lovell Aldrin 2002 Panel Discussion at Pensacola with the Mercury Astronauts Gotcha Documentary The Lighthouse Never Fails U S Space Documentary The Flight of Freedom 7 Mercury Astronauts Documentary The First Gotcha film of Apollo 12 [Apollo 1](#) Ryan S. Walters, 2021-05-25 On January 27 1967 astronauts Gus Grissom Ed White and Roger Chaffee climbed into a new spacecraft perched atop a large Saturn rocket at Kennedy Space Center in Florida for a routine dress rehearsal of their upcoming launch into orbit then less than a month away All three astronauts were experienced pilots and had dreams of one day walking on the moon But little did they know nor did anyone else that once they entered the spacecraft that cold winter day they would never leave it alive The Apollo program would be perilously close to failure before it ever got off the ground But rather than dooming the space program this tragedy caused the spacecraft to be completely overhauled creating a stellar flying machine to achieve the program s primary goal putting man on the moon Apollo 1 is a candid portrayal of the astronauts the disaster that killed them and its aftermath In it readers will learn How the Apollo 1 spacecraft was doomed from the start with miles of uninsulated wiring and tons of flammable materials in a pure oxygen atmosphere along with a hatch that wouldn t open How due to political pressure the government contract to build the Apollo 1 craft went to a bidder

with an inferior plan How public opinion polls were beginning to turn against the space program before the tragedy and got much worse after Apollo 1 is about America fulfilling its destiny of man setting foot on the moon It s also about the three American heroes who lost their lives in the tragedy but whose lives were not lost in vain Inventing the American Astronaut Matthew H. Hersch,2012-10-08 Who were the men who led America s first expeditions into space Soldiers Daredevils The public sometimes imagined them that way heroic military men and hot shot pilots without the capacity for doubt fear or worry However early astronauts were hard working and determined professionals organization men who were calm calculating and highly attuned to the politics and celebrity of the Space Race Many would have been at home in corporate America and until the first rockets carried humans into space some seemed to be headed there Instead they strapped themselves to missiles and blasted skyward returning with a smile and an inspiring word for the press From the early days of Project Mercury to the last moon landing this lively history demystifies the American astronaut while revealing the warring personalities raw ambition and complex motives of the men who were the public face of the space program

**Lab Coats in Hollywood** David A. Kirby,2013-02-08 How science consultants make movie science plausible in films ranging from 2001 A Space Odyssey to Finding Nemo Stanley Kubrick s 2001 A Space Odyssey released in 1968 is perhaps the most scientifically accurate film ever produced The film presented such a plausible realistic vision of space flight that many moon hoax proponents believe that Kubrick staged the 1969 moon landing using the same studios and techniques Kubrick s scientific verisimilitude in 2001 came courtesy of his science consultants including two former NASA scientists and the more than sixty five companies research organizations and government agencies that offered technical advice Although most filmmakers don t consult experts as extensively as Kubrick did films ranging from A Beautiful Mind and Contact to Finding Nemo and The Hulk have achieved some degree of scientific credibility because of science consultants In Lab Coats in Hollywood David Kirby examines the interaction of science and cinema how science consultants make movie science plausible how filmmakers negotiate scientific accuracy within production constraints and how movies affect popular perceptions of science Drawing on interviews and archival material Kirby examines such science consulting tasks as fact checking and shaping visual iconography Kirby finds that cinema can influence science as well Depictions of science in popular films can promote research agendas stimulate technological development and even stir citizens into political action

**Personality Capture and Emulation** William Sims Bainbridge,2013-11-12 Personality Capture and Emulation is the gateway to an amazing future that actually may be achieved enabling the preservation and simulation of human personalities at progressively higher levels of fidelity This challenge is no longer the province merely of uninhibited visionaries but has become a solid field of research drawing upon a wide range of information technologies in human centered computing and cyber human systems Even at modest levels of accomplishment research in this emerging area requires convergence of cognitive social and cultural sciences in cooperation with information engineering and artificial intelligence thus stimulating

new multidisciplinary perspectives Therefore this book will inspire many specific research and development projects that will produce their own valuable outcomes even as the totality of the work moves us closer to a major revolution in human life Will it ever really be possible to transfer a human personality at death to a technology that permits continued life Or will people come to see themselves as elements in a larger socio cultural system for which a societal information system can provide collective immortality even after the demise of individuals A large number and variety of pilot studies and programming projects are offered as prototypes for research that innovators in many fields may exploit for the achievement of their own goals Together they provide an empirical basis to strengthen the intellectual quality of several current debates at the frontiers of the human and information sciences

*Space Tourism* John Spencer, Karen L. Rugg, 2004 Welcome Aboard Space is only 100 miles away from anywhere on Earth Since the early 1980s a small group of visionaries have been pioneering the frontier of off world tourism Overcoming significant obstacles their quest to start the space tourism industry was achieved on 28 April 2001 when American businessman Dennis Tito lifted off from Russia into Earth orbit for a week long voyage aboard the International Space station He was the first space tourist Upon boarding the Station he said I love space He paid millions of his own dollars to fulfil his life long quest to experience space Since then another space tourist has flown and many more are lining up for the opportunity In the future space passengers will float and dance in zero gravity swim in spheres of warm coloured water enjoy games saunas exercise massage shopping and world class entertainment Several private enterprise space tourism companies have recently been formed some by multibillionaires including the co founder of Microsoft Paul Allen and the founder of Amazon com Jeff Bezos They are spending millions of dollars of their own money Why Because they are positioning themselves to be leaders the Walt Disney and Baron Hilton of the space tourism industry an industry destined to be the largest most prestigious and profitable industry off world This is the first book published in the US on the space tourism theme It was written and designed by one of the worlds leading authorities and pioneers in the growing field of space tourism space architect John Spencer The book premieres his vision the Destiny orbital super yacht design and master development industry plan for expanding the space tourism movement and creating the long term space tourism industry His plan offers opportunities for non rocket scientists to participate today to make a difference and to have a wonderful time in the process

Popular Culture and Everyday Life is the new space for critical books in cultural studies The series innovates by stressing multiple theoretical political and methodological approaches to commodity culture and lived experience borrowing from sociological anthropological and textual disciplines Each volume develops a critical understanding of a key topic in the area through a combination of a thorough literature review original research and a student reader orientation

**The Writers Directory**, 2013 *Krafft Ehrlicke's Extraterrestrial Imperative* Marsha Freeman, Krafft A. Ehrlicke, 2009 From this book the reader will gain an insight into one of the most creative minds in the history of space exploration Krafft Ehrlicke s

contribution to space exploration encompasses details of new innovative ideas but also how to think about the importance and value of space exploration for society The reader will gain an understanding of the early history of the space pioneers what they have helped accomplish and how Ehrlicke s vision of where we should be going can shape the future At this time when there are questions about the path of the space program for the next decades Krafft Ehrlicke has laid out the philosophical framework for why space exploration must be pursued through his concept of the Extraterrestrial Imperative and the fight that he waged over many years for a long range vision for the program Readers will find it a very imaginative work and a very up lifting story Krafft Ehrlicke s Extraterrestrial Imperative is the summation of his work on encouraging the exploration and development of space The book contains all of his reasons why we need to get off the planet and explore space
