Reality Construction in Society Burkart Holzner,1968 *Reality Construction in Society* Burkart Holzner,1972

The Social Construction of Reality Peter L. Berger,Thomas Luckmann,1967-07-11 Called the fifth most important sociological book of the 20th century by the International Sociological Association this groundbreaking study of knowledge introduces the concept of social construction into the social sciences for the first time In it Berger and Luckmann reformulate the task of the sociological subdiscipline that since Max Scheler has been known as the sociology of knowledge **Software**

Development and Reality Construction Christiane Floyd,Heinz Züllighoven,Reinhard Budde,Reinhard Keil-Slawik,2012-12-06 The present book is based on the conference Software Development and Reality Construction held at SchloB Eringerfeld in Germany September 25 30 1988 This was organized by the Technical University of Berlin TUB in cooperation with the German National Research Center for Computer Science GMD Sankt Augustin and sponsored by the Volkswagen Foundation whose financial support we gratefully acknowledge The conference was an interdisciplinary scientific and cultural event aimed at promoting discussion on the nature of computer science as a scientific discipline and on the theoretical foundations and systemic practice required for human oriented system design In keeping with the conversational style of the conference the book comprises a series of individual contributions arranged so as to form a coherent whole Some authors reflect on their practice in computer science and system design Others start from approaches developed in the humanities and the social sciences for understanding human learning and creativity individual and cooperative work and the interrelation between technology and organizations Thus each contribution makes its specific point and can be read on its own merit But at the same time it takes its place as a chapter in the book along with all the other contributions to give what seemed to us a meaningful overall line of argumentation This required careful editorial coordination and we are grateful to all the authors for bearing with us throughout the slow genesis of the book and for complying with our requests for extensive revision of some of the manuscripts [The Linguistic Construction of Reality](#)

George William Grace,1987 **The Communicative Construction of Reality** Hubert Knoblauch,2019-12-06 This volume advocates a shift from the social constructivism found in the work of Thomas Luckmann and Peter Berger to a communicative constructivism that acknowledges communication as an embodied form of action in its own right according to which social actors in engaging in communicative action construct a material social reality that guides delimits and enables actions A study of the importance of understanding the role of communication in an age in which digitization and mediatization have extended the reach of communication to a global level and brought about the emergence of the communication society The Communicative Construction of Reality shows how communication society does not merely replace modern society and its hierarchical institutions but complements it in a manner that continually results in conflicts leading to the refiguration of society As such it will appeal to scholars of sociology with interests in the sociology of knowledge communication and social
