Reasoning And The Explanation Of Actions:

Reasoning and the Explanation of Actions David Milligan, 1980 **From Individual to Plural Agency** Kirk Ludwig, 2016-10-06 Kirk Ludwig develops a novel reductive account of plural discourse about collective action and shared intention Part I develops the event analysis of action sentences provides an account of the content of individual intentions and on that basis an analysis of individual intentional action Part II shows how to extend the account to collective action intentional and unintentional and shared intention expressed in sentences with plural subjects On the account developed collective action is a matter of there being multiple agents of an event and it requires no group agents per se Shared intention is a matter of agents in a group each intending that they bring about some end in accordance with a shared plan Thus their participatory intentions their we intentions differ from individual intentions not in their mode but in their content Joint intentional action then is a matter of a group of individuals successfully executing a shared intention The account does not reduce shared intention to aggregates of individual intentions However it argues that the content of we intentions can be analyzed wholly in terms of concepts already at play in our understanding of individual intentional action The account thus vindicates methodological individualism for plural agency The account is contrasted with other major positions on shared intention and joint action and defended against objections This forms the foundation for a reductive account of the agency of mobs and institutions expressed in grammatically singular action sentences about groups and their intentions in a second volume *Routledge Handbook of Interpretive Political Science* Mark Bevir, R. A. W. Rhodes, 2015-07-03 Interpretive political science focuses on the meanings that shape actions and institutions and the ways in which they do so This Handbook explores the implications of interpretive theory for the study of politics It provides the first definitive survey of the field edited by two of its pioneers Written by leading scholars from a range of disciplinary backgrounds the Handbook's 32 chapters are split into five parts which explore the contrast between interpretive theory and mainstream political science the main forms of interpretive theory and the theoretical concepts associated with interpretive political science the methods used by interpretive political scientists the insights provided by interpretive political science on empirical topics the implications of interpretive political science for professional practices such as policy analysis planning accountancy and public health With an emphasis on the applications of interpretive political science to a range of topics and disciplines this Handbook is an invaluable resource for students scholars and practitioners in the areas of international relations comparative politics political sociology political psychology and public administration [Global Journalism Ethics](#) Stephen J.A. Philosophical Problems in Psychology Neil Bolton, 2025-04-01 Philosophical psychology reflects upon the aims and the concepts of empirical psychology First published in 1979 Philosophical Problems in Psychology argues that empirical psychology must be founded upon the language of rationality for actions and the reasons people give for their actions are at the heart of human behaviour This thesis is defended in the contributions to Part I which assert that psychology must take the form of an elaboration of common sense But the authors in Part II maintain that psychology may remain faithful to this insight whilst still developing more sophisticated models of behaviour The use of computer models Piaget's views on the effects of internalization and a discussion of the geometry of phenomenal space provide illustrations Part III contains three papers which explore the limitations of theoretical statements which emphasize our construction of reality The pertinence of the computer analogy is disputed subject centred models are scrutinized in the light of phenomenology and the role of theory in psychotherapy is critically discussed
