**N Colangelo**

## **Recess The Experiment:**

**Recess** Judy Katschke, 1998 A group of fourth graders conduct an experiment to put to rest an unbelievable rumor that older boys actually enjoy kissing girls *The Child at School* Peter Blatchford, Anthony D. Pellegrini, Ed Baines, 2015-07-16 What is the nature of children's social life in school How do their relationships and interactions with peers teachers and other school staff influence their development and experience of school This book written by leading researchers in educational and developmental psychology provides answers to these questions by offering an integrated perspective on children's social interactions and relationships with their peers and teachers in school Peer interactions in school have tended to be underestimated by educationalists and this book redresses the balance by giving them equal weight to teacher-child interactions In this second edition the authors extensively revise the text on the basis of many years of research and teaching experience They highlight common misconceptions about children their social lives and school achievement which have often resulted in ineffective school policy The book includes a number of important topics including The significance of peer friendships at school The nature and importance of play and break times Aggression and bullying at school Peer relations and learning at school The classroom environment and teacher-pupil interaction The influence of gender in how children learn at school Advantages and disadvantages of different methodological approaches for studying children in school settings Policy implications of current research findings *The Child at School* will be essential reading for all students of child development and educational psychology It will also be an invaluable source for both trainee and practicing teachers and teaching assistants as well as clinical psychologists and policy makers in this area *Play = Learning* Dorothy G. Singer, Roberta Michnick Golinkoff, Kathy Hirsh-Pasek, 2006-08-24 Publisher description [Handbook of Research on Schools, Schooling and Human Development](#) Judith L. Meece, Jacquelynne S. Eccles, 2010-06-10 Children spend more time in school than in any social institution outside the home And schools probably exert more influence on children's development and life chances than any environment beyond the home and neighbourhood The purpose of this book is to document some important ways schools influence children's development and to describe various models and methods for studying schooling effects Key features include Comprehensive Coverage this is the first book to provide a comprehensive review of what is known about schools as a context for human development Topical coverage ranges from theoretical foundations to investigative methodologies and from classroom level influences such as teacher-student relations to broader influences such as school organization and educational policies Cross-Disciplinary this volume brings together the divergent perspectives methods and findings of scholars from a variety of disciplines among them educational psychology developmental psychology school psychology social psychology psychiatry sociology and educational policy Chapter Structure to ensure continuity chapter authors describe 1 how schooling influences are conceptualized 2 identify their theoretical and methodological approaches 3 discuss the strengths and weaknesses of existing research and 4 highlight implications for future research practice and

policy Methodologies chapters included in the text feature various methodologies including longitudinal studies hierarchical linear models experimental and quasi experimental designs and mixed methods
