Sampson, 2016-06-02 This book explores how complex systems theory can contribute to the understanding of classroom language learner motivation through an extended examination of one particular situated research project Working from the lived experience of the participants the study describes how action research methods were used to explore the dynamic conditions operating in a foreign language classroom in Japan The book draws attention to the highly personalised and individual yet equally co formed nature of classroom foreign language learning motivation and to the importance of agency and emotions in language learning It presents an extended illustration of the applicability of complex systems theory for research design and process in SLA and its narrative approach shines light upon the evolving nature of research and role of the researcher The study will be a valuable resource for practitioners researchers and postgraduate students interested in classroom language teaching and learning especially those with a focus on motivation among learners *Corpus Linguistics at Work* Elena Tognini-Bonelli, 2001-01-01 This work aims to provide insights into the way a corpus can be used the type of findings that can be obtained the possible applications of these findings as well as the theoretical changes that corpus work can bring into linguistics and language engineering Topics include the rise of corpus linguistics delexicalization semantic prosodies and different corpora for different purposes *Expanding the Landscapes of Irish English Research* Stephen Lucek, Carolina P. Amador-Moreno, 2021-11-29 This collection brings together work from scholars across sociolinguistics World Englishes and linguistic landscapes to reflect on developments and future directions in Irish English building on the ground breaking contributions of Jeffrey Kallen to the discipline Taking their cue from Kallen s extensive body of work on Irish English the 20 contributors critically examine advances in the field grounded in frameworks from variationist sociolinguistics and semiotic and border studies in linguistic landscapes Chapters cover pragmatic cognitive sociolinguistic sociophonetic historical and World Englishes perspectives as well as two chapters which explore the border between Northern Ireland and the Republic of Ireland through the lens of perceptual dialectology and linguistic landscape research Taken together the collection showcases the significant role Kallen has played in the growth of Irish English studies as a field in its own right and the impact of this work on a new wave of researchers in the field today and beyond This volume will be of particular interest to scholars of varieties of English variationist sociolinguistics and linguistic landscape research **Towards a Transparent Labour Market for Educational Decisions** Han Heijke, Lex Borghans, 2018-12-20 First published in 1998 this collection of essays strongly advocates for increased flexibility in the Dutch labour market and questions current assumptions on the connections between education choices and ultimate employment outcomes The volume responds to the glaring contradiction between the current mass unemployment in all European nations both in urban and rural areas affecting people of different levels of education though primarily those of low skills levels or ethnic backgrounds and the idea that labour is the most

important source of wealth Its objective is to develop insights ideas and experiences concerning the possibilities for increasing the transparency of the labour market The contributors recognise that the quality of labour has rapidly become the key factor in economic and social development Accountant Student and Accountants' Journal ,1929 **The Sociophonetics of Dublin English** Marion Schulte,2023-08-15 The Sociophonetics of Dublin English shows how social inequalities and language are connected by the stances speakers take in interaction It is based on an instrumental phonetic analysis of recorded interviews and broadcasting data and a detailed qualitative account of the same data as well as the socio cultural context in Ireland The analysis not only considers macro social categories but also pragmatic norms and situational more fluid aspects of communication Contemporary social meanings and associated phonetic realisations are described and explained as the result of diachronic developments Since the independence of Ireland local pronunciations have been re evaluated and realisations connected with the former coloniser have fallen out of use even in formal and powerful domains This investigation thus highlights the importance of diachronic data to understand contemporary sociolinguistic variation
