Reflexivization A Study In Universal Syntax:

Reflexivization Leonard M. Faltz, 2016-11-10 This title first published in 1985 is the result of a cross linguistic comparative study of reflexives with a major role played by syntactic conditions on reflexivization rules The basic definitions outlined in the book lead to a discussion of morphological types discussions about syntax and speculations on the historical origins and destinies of the various kinds of reflexives This title will be of interest to students of language and linguistics

Reflexivization Leonard M. Faltz, 1900 [The Handbook of Contemporary Syntactic Theory](#) Mark Baltin, Chris Collins, 2008-04-15 This volume provides a comprehensive view of the current issues in contemporary syntactic theory Written by an international assembly of leading specialists in the field these 2 original articles serve as a useful reference for various areas of grammar Contains 23 articles written by an international assembly of specialists in the field The lucidly written articles grant accessibility to crucial areas of syntactic theory Contrasting theories are represented Contains an informative introduction and extensive bibliography which serves as a reference tool for both students and professional linguists [Dissolving Binding Theory](#) Johan Rooryck, Guido J. vanden Wyngaerd, 2011 This book examines the distribution and interpretation of anaphors and pronouns Through a detailed analysis of simplex and complex anaphors in Dutch and English as well as other Romance and Germanic languages the authors show that the relationship between an anaphor and its antecedent can be captured in terms of general Minimalist principles *THE FUNCTION OF PRONOMINAL EXPRESSIONS IN PUXIAN* JIANMING WU, 2018-09-06 Puxian is one of the Min dialects in China This book investigates the function of pronominal expressions in Puxian focusing especially on three prominent issues in the linguistic literature viz impersonal reference self forms and person effects on word order The investigation of impersonality deals with a group of constructions in Puxian that have pronominalized subjects but crucially with impersonal reference By means of careful examination these subjects are for the first time projected onto five semantic domains on a connected loop The discussion on self forms in Puxian focuses on their interrelated functions along the pathway of grammaticalization such as reflexivity intensification viewpoint markings verbal manner etc Significantly this discussion is based on the latest functional typological perspectives which is different from previous approaches to Mandarin ziji The attention to word order and person effect is related to the polyfunctional morpheme k 21 which plays a part in several constructions ranging from the monotransitives ditransitives causatives passives and even to the intransitives The main concern is how the grammatical category of person as a whole may affect the placement of syntactic constituents as well as encodings of argument roles by means of the morpheme k 21 Since Puxian has been relatively unknown in linguistics a sketch of Puxian grammar and language situation is also offered in this book **Presumptive Meanings** Stephen C. Levinson, 2000-04-24 This is the first extended discussion of preferred interpretation in language understanding integrating much of the best research in linguistic pragmatics from the last two decades When we speak we mean more than we say In this book Stephen C Levinson explains some general

processes that underlie presumptions in communication This is the first extended discussion of preferred interpretation in language understanding integrating much of the best research in linguistic pragmatics from the last two decades Levinson outlines a theory of presumptive meanings or preferred interpretations governing the use of language building on the idea of implicature developed by the philosopher H P Grice Some of the indirect information carried by speech is presumed by default because it is carried by general principles rather than inferred from specific assumptions about intention and context Levinson examines this class of general pragmatic inferences in detail showing how they apply to a wide range of linguistic constructions This approach has radical consequences for how we think about language and communication

Locality and Logophoricity Isabelle Charnavel, 2019-10-23 Locality and Logophoricity investigates what the distribution of pronominal expressions in various languages can tell us about the structure of the human language faculty The exploration of this question in the past fifty years has led to the development of a general theory of referential dependency namely Binding Theory This book focuses on Condition A of this theory which concerns referentially dependent expressions such as English herself French elle m me or Mandarin ziji Specifically it tackles an issue of apparent ambiguity presented by many of these reflexives across languages in a large number of unrelated languages we observe that the same reflexive form must obey either syntactic constraints or discourse constraints related to perspective The specific aim of the book is to describe and explain this widespread dual behavior of reflexives A detailed empirical investigation based mainly on systematically collected French English Icelandic Mandarin and Korean data leads the author to propose a unified solution to this issue This proposal has consequences both for Binding Theory and for the theory of logophoricity which addresses the impact of perspective on linguistic systems

The Volume contains written versions of some contributions to the Fifth International Conference on Middle English ICOME 5 held at the University of Naples in 2005 Most of the papers concentrate on individual aspects of grammar and semantics although some focus on dialectal fragmentation and others adopt a pragmatic perspective There is still a lot to be done in the study of the Middle English lexicon in the same way as there are many aspects of grammar that have not been fully studied yet The volume aims at providing contributions that can further the knowledge of these subfields of English historical linguistics through state of the art case studies that also exploit all modern resources such as computerised corpora and electronically tagged texts
