**One Welfare in Practice** Tanya Stephens,2021-10-25 Animal welfare has long been recognised as central to the role of the veterinary professional but this is increasingly aligned with the welfare of humans and the broader environment in which we co exist This is the first book dedicated to the role of the veterinarian in One Welfare a concept that

recognises the interconnections between animal welfare human wellbeing and the environment The book demonstrates through a wide range of international case studies why professional ethics and the use of good evidence is integral to this role Contributors bring a rich variety of writings each with their own perception of the role of the veterinarian in improving animal welfare and human wellbeing One Welfare in Practice The Role of the Veterinarian emphasises the importance of interdisciplinary collaboration and solutions it is essential that veterinary practitioners recognise when other professionals or disciplines need to be consulted to benefit both animals and humans With its multiple fascinating approaches to One Welfare this book will inform and inspire the veterinarian to find areas where collaborative action reaps the greatest rewards This unique book shows how veterinarians can and are contributing to improving animal and human welfare offering practical advice as to how the profession can further engage in One Welfare in a range of settings **Looking After Fish** ,1975

**Toxic Sexual Politics** Melina Packer,2025-01-28 A bold expos of how the very foundation of toxicology has been contaminated by sexist and racist ideologies The first critical understanding of the field of toxicology from a feminist and antiracist perspective Toxic Sexual Politics asserts that the science of toxicants must be held accountable for the uneven distribution of toxic pollution along racial and sexual lines Drawing upon in depth interviews and extensive ethnographic and archival research including participant observations in toxicology classrooms conferences and laboratories Melina Packer urges environmental health advocates to place toxicant science within its masculinist militarist and eugenicist history Toxic Sexual Politics shows how the founding fathers of U S toxicology were ideologically aligned with the chemical industry inventing a science that could make chemicals safe as opposed to one that could adequately protect planetary health from toxicants hazards While many toxicologists today are critical of the chemical industry they continue to rely on the highly limited tools of toxicology as accurate measures of toxicity as do government regulators the courts and environmental advocates Unlike most critiques of the chemical industry and narratives of environmental health movements Toxic Sexual Politics refuses to take the science at face value By focusing on the sexist racist and ableist biases reinforced by toxicology Packer powerfully argues that this scientific discipline reproduces the very same white supremacist and heterosexist logics that generated environmental injustices in the first place The field of toxicology can explicitly confront chemical corporate power by building from queer feminist anti ableist and antiracist movements for environmental and reproductive justice
