Pathology Of Cardiac Valves:

Pathology of Cardiac Valve Disease Gaetano Thiene, Cristina Basso, Stefania Rizzo, Mila Della Barbera, Marialuisa Valente, Uberto Bortolotti, 2023-09-30 Cardiac valve diseases are a major cause of morbidity and mortality around the globe. In third world countries inflammatory rheumatic valve disease in the young represents an endemic calamity while in Western countries degenerative valve diseases like senile calcific aortic stenosis and mitral valve prolapse as a result of mucoid degeneration with incompetence are major causes of death in adults the elderly. Since the 1960s surgical valve replacement has been the only treatment option requiring sternotomy, cardiopulmonary bypass and cardiac arrest. Permanent anticoagulation for mechanical valves and the limited durability of biological valves constituted significant drawbacks. Moreover, these surgeries often require surgical replacement. The cardiac registry at the University of Padua, Italy, has gathered more than twelve hundred cases of failed prosthetic valves offering a unique resource for teaching and research. Conservative valve repair using a minimally invasive technique showed that replacement of the native valve with sternotomy can be spared. Moreover, in the last decade venous or arterial approaches like TAVI were developed. Presenting the essential surgical and interventional anatomy and pathology in detail, this book offers a valuable tool for cardiologists, cardiac surgeons, and pathologists, as well as people in training and scientists working in the field of medical devices and biological compatibility.

Pathology of Heart Valve Replacement A.G. Rose, 2012-12-06 Dr Rose honoured me with a request for a Foreword. I am delighted to oblige. The treatment of valvular heart disease has improved remarkably in the past 40 years. Many factors have contributed, not least being the introduction of artificial heart valves for treatment more than 25 years ago. Their use has shown that they are good but not an ideal substitute for native valves. A galaxy of pathological changes are associated with the insertion and malfunction of artificial heart valves. Each has to be defined, classified, and related to clinical procedures or problems with a prosthesis, then a means sought to prevent them. Often, in understanding their cause, investigative procedures will improve patient care and broaden knowledge in other spheres. Dr Rose has been a student of this pathology for many years and has made many contributions. No doubt his interest in the area was whetted by colleagues in Cape Town, leaders in the field of cardiovascular medicine and surgery. This monograph provides a collected review of his experience. In it, one finds lessons in geographic pathology in considering the causes of valvular heart disease in Cape Town and valuable information regarding the identification of artificial heart valves and a means of examining a heart bearing one.
