C. G. Jung and the Alchemical Imagination Stanton

Marlan, 2020-12-29 Winner of the 2021 American Board Academy of Psychoanalysis Annual Book Prize for Best Theoretical Book in Psychoanalysis Stanton Marlan brings together writings which span the course of his career examining Jungian psychology and the alchemical imagination as an opening to the mysteries of psyche and soul Several chapters describe a

telos that aims at the mysterious goal of the Philosophers Stone a move replete with classical and postmodern ideas catalysed by prompts from the unconscious dreams images fantasies and paradoxical conundrums Psyche and matter are seen with regards to soul light and darkness in terms of illumination and order and chaos as linked in the image of chaosmos Marlan explores the richness of the alchemical ideas of Carl Jung James Hillman and others and their value for a revisioning of psychology In doing so this volume challenges any tendency to literalism and essentialism and contributes to an integration between Jung s classical vision of a psychology of alchemy and Hillman s Alchemical Psychology C G Jung and the Alchemical Imagination will be a valuable resource for academics scholars and students of Jungian and post Jungian studies Jungian analysis and psychotherapy It will also be of great interest to Jungian psychologists and Jungian analysts in practice and in training

C. G. Jung in the Humanities Susan Rowland,2019-09-23 This book demonstrates for the first time the significance of Jung s work to the humanities and to those areas where the humanities and sciences share borders More radically it shows that Jung was a writer of myth alchemy narrative and poetics as well as on them Jung s core concepts are introduced their ongoing relevance is championed The book also addresses Jung s sometimes questionable judgment on politics and gender and previews contemporary extensions of Jungian theory By privileging the creative psyche and exploring the connections between individual natural environment and social psychological collective Jung anticipates the new holism offering the promise of reconciling the sciences with the arts humanity with nature

Jung and Phenomenology Roger Brooke,2015-02-11 Jung and Phenomenology is a classic text in the field of Jungian scholarship Originally published in 1991 it continues to be essential to conversations regarding the foundations of Jungian thought This Classic Edition of the book includes a brand new introduction by the author Jung described his own approach as phenomenological particularly as it contrasted with Freud s psychoanalysis and with medical psychiatry However Jung s understanding of phenomenology was inconsistent and he writes with an epistemological eclecticism which leaves him often at cross purposes with himself In Jung and Phenomenology Brooke systematically addresses the central ideas of Jung s thought The major developments in the post Jungian tradition are extensively integrated into the conversation as are clinical issues meaning that the book marks a synthesis of insights in the contemporary Jungian field His reading and interpretation of Jung are guided by the question of what it is that Jung is trying to show but which tends to be obscured by his formulations Examining the meaning of Jung s theoretical ideas in concrete existential terms Jung and Phenomenology is essential reading for psychoanalysts psychologists and students interested in the Jungian tradition and existential phenomenology

The Archaeology of Semiotics and the Social Order of Things George Nash,George C. Children,2008 The Archaeology of Semiotics and the social order of things is edited by George Nash and George Children and brings together 15 thought provoking chapters from contributors around the world A sequel to an earlier volume published in 1997 it tackles the problem of understanding how complex communities interact with landscape and shows how the rules concerning landscape constitute a recognised and readable grammar The

mechanisms underlying landscape grammar are both physical and mental being based in part on the mindset of the individual the same landscape can thus evoke different meanings for different people and at different times People's perception has greatly influenced the construction of landscapes over millennia but until recently the potential of this area has been largely untapped Apart from chapters focusing solely upon human interaction with landscape there are several which skilfully integrate artefacts and place with landscape e.g Gheorghiu and Sognnes Other chapters look at the way people have marked the landscape through such mechanisms as rock art e.g Clegg Devereux Est vez Fossati Kelleher and Skier Rock art establishes personal and communal identity in relation to landscape and it is clear that other forms of visual expression were in place which distinctively created special places within the landscape Landscape constructs can bind cultures together bringing the old ways of reading the landscape into contemporary life e.g Smiseth Defining early and late prehistoric landscapes and segregating these into say mundane domestic and ritualised spaces rely on both clear and subtle archaeologies and in this volume distinct monument clustering and ritualised linearity are considered e.g Mason and Nash A volume such as this cannot escape the influence of New World approaches such as anthropology and in many respects chapters by Bender Muller and Merritt give context to other chapters within the book Finally one must consider text as a means of constructing landscape and this is considered by Heyd who eloquently deconstructs the travel diary of a 17th century Japanese poet This will be an important volume for archaeologists landscape scholars and students The many approaches used are tried and tested forming an invaluable resource and not just another edited book
