Binary Role Theory and the Dynamics of World Politics Stephen Walker, 2024-10-30 This book develops a binary role theory of world politics extending from the micro analysis of foreign policy to the macro analysis of world politics The effort employs analytical tools outside of role theory to extend role concepts from agents spatially to finitely generated systems and temporally to different phases and sequences of social interaction between pairs of agents as ego and alter There is an initial emphasis on thinking small about the interactions of agents as the building blocks of world politics and then tracing the processes of aggregation that generate the emergence and evolution of larger patterns of international relations over time Empirical case studies from different historical eras and geographical regions illustrate the application of binary role theory models to problems of conflict management alliance formation diplomatic engagement and transitions in world order The analysis employs complex adaptive systems CAS analysis to go beyond the study of political science in building bridges to the natural sciences by using concepts and models from the Standard Model in physics and the Modern Synthesis in biology This book will interest an audience of foreign policy scholars and international relations theorists as well as students of quantum and computational models of world politics

The Patterns of World Politics Kim Richard Nossal, 1998 [Patterns of Order and Changes in International Relations](#) Kiichi Fujiwara, 2002-11-12 Does the world of international relations change at all Although this question appears simple previous research on the subject has failed to provide a definitive answer The neo realist school maintains that the structure of international politics has and will remain unchallenged unless a new worldwide authority that imposes sanctions on deviant behaviors supersedes the existing power structure The liberal school argues that international relations have changed dramatically either from a traditional authority to more institutional and liberal if not democratic forms of polity and that globalization and the interdependence of nations have challenged the isolated autonomy of the sovereign states Both oversimplify the historical change or lack thereof that has occurred worldwide In this paper the study of the transition of international society will be re evaluated after adding another factor to the equation that is the entry of non Western actors and powers into the calculus of classical power politics
