

9. Longer-term sustainability and other fiscal risks should be identified, assessed and managed prudently

- To promote a stable development of public finances, mechanisms should be applied to promote the resilience of budgetary plans and to mitigate the potential impact of fiscal risks. Fiscal risks, including contingent liabilities, should be clearly identified, explained and classified by type, so as to inform consideration and debate about the appropriate fiscal policy course adopted in the budget. Fiscal risks should also be quantified as far as possible, and the mechanisms for managing these risks should be made explicit and reported in the context of the annual budget.
- Longer-term demographic changes and other social and environmental factors can also give rise to major pressures and challenges for the sustainability and inter-generational equity of budgetary policy. A report on long-term sustainability of the public finances should be published regularly enough to make an effective contribution to public and political discussion on this subject, and its policy messages – both near-term and longer-term – should be presented and considered in the budgetary context.

10. The integrity and quality of budgetary forecasts, fiscal plans and budgetary implementation should be promoted through rigorous quality assurance including independent audit.

- The CBA needs to command the confidence of a broad range of stakeholders – across government, within parliament and the public, and internationally – in the quality and integrity of its budgetary forecasts and fiscal plans and in its ability to manage budgetary implementation and delivery.
- In the first instance, governments should invest continually in the skills and capacity of staff to perform their roles effectively – whether in the CBA, line ministries or other institutions – taking into account national and international experiences, practices and standards.
- The credibility of national budgeting – including the professional objectivity of economic forecasting, adherence to fiscal rules, longer-term sustainability and handling of fiscal risks – may also be enhanced through independent fiscal institutions or other structured, institutional processes for allowing impartial scrutiny of, and input to, government budgeting. An open, transparent and participative approach to budgeting (see points 4 and 5 above) also promotes the credibility and quality of the budgetary process.
- Independent internal audit is an essential safeguard for the quality of integrity of budget processes and financial management within all ministries and public agencies.
- The supreme audit institution (SAI) has a fundamental role, as an independent guardian of the public trust, in assuring the proper use of budgeted resources. A well-functioning SAI should deal authoritatively with all aspects of financial accountability, including through its audit reports which should be published in a timely manner, relevant for the budgetary cycle. As regards efficiency and value for money, both the internal and external control systems should have a role in auditing the cost-effectiveness of individual programmes and in assessing the quality of performance accountability and governance frameworks more generally (see also point 8 above).

Congressional Budget Office,1998 **Long-Term Budgetary Pressures and Policy Options** ,1998 The large baby boom generation will begin to retire in about 10 years and as the demographic structure of the population changes federal revenues will grow more slowly and outlays for Social Security Medicare and Medicaid will rise Moreover because spending per enrollee in Medicare and Medicaid is expected to climb faster than the average wage the share of income spent on those programs will increase even without any change in demography Because of those pressures the Congressional Budget Office CBO projects that deficits will reemerge and grow in the years after 2008 unless current policies are changed The long term deficit problem could be resolved by many combinations of spending reductions and tax increases This report focuses on Social Security and Medicare because those programs are so large and so directly affected by the aging of the population The approaches discussed illustrate the types of steps that could be taken to slow the growth in spending on those programs The analysis shows how combinations of those options would reduce the size of the long term fiscal imbalance Although it will be difficult to limit spending on entitlements for the elderly in the face of the projected increase in the number of people eligible for them doing so will confer substantial gains on the economy *List of Publications* United States.
