DePace, Stephen Soloway, Michael Yayac, Joe Colombo, 2025-09-26 This book covers Ehlers Danlos and hypermobility syndromes with an emphasis on treatment of the parasympathetic and sympathetic P S nervous system dysfunctions Unfortunately most EDS HSD patients have been misdiagnosed and misunderstood by providers EDS HSD is a multisystem multifaceted disorder that is poorly understood The P S manifestations and treatments are also poorly understood throughout the healthcare community To this end the authors wish to teach providers and patients alike to reduce the life long suffering from both the disorder and the marginalization There are two aspects of teaching that are required and provided by this book improved understanding of EDS HSD and improved understanding of P S autonomic dysfunction and treatment For example with the autonomic nervous system more treatment or therapy is never better Relief

of P S dysfunction must be low and slow to prevent causing more symptoms from higher doses of medication or polypharmacy To this end stress often sets patients back and both providers and patients alike must have proper expectations set for successfully improving patient outcomes quality of life and productivity The book starts with an introduction to and history of the disorder Chapter II provides a review of the genetics of collagen the source of the disorders Chapters III through IX detail the various forms of EDS HSD and goes into more detail on the more common and more well known variants of EDS HSD Chapter X discusses structural cardiovascular and pulmonary dysfunction associated with EDS HSD Chapter XI discusses structural gastrointestinal and urogenital dysfunction associated with EDS HSD The book ends with Chapter XII which details the involvement of the P S nervous systems and how to treat which also has general application to other chronic disorders This is an ideal guide for rheumatologists and primary care physicians treating patients with Ehlers Danlos and hypermobility syndromes and patients and their loved ones in understanding their disease and disorders and the associated treatments and therapies

Dubious Equalities and Embodied Differences Kathy Davis,2003-10-01 Dubious Equalities and Embodied Differences explores cosmetic surgery as a cultural phenomenon of late modernity From its onset as a medical specialty at the end of the nineteenth century cosmetic surgery has been intimately linked to discourses of normalcy as well as to gender race and other categories of difference that have shaped its technologies and techniques its professional ideologies and the objects of its interventions Davis considers how cosmetic surgery is taken up in representations of cosmetic surgery in medical discourse and in popular culture drawing on a wide range of cultural manifestations including televised infotainment popular music performance art surgeon biographies stories of patients public debates and medical texts Davis critically engages with the notion of cosmetic surgery as a neutral technology and shows how it is implicated in the surgical erasure of embodied difference

Seeking Asylum Alison Mountz, In July 1999 Canadian authorities intercepted four boats off the coast of British Columbia carrying nearly six hundred Chinese citizens who were being smuggled into Canada Government officials held the migrants on a Canadian naval base which it designated a port of entry As one official later recounted to the author the Chinese migrants entered a legal limbo treated as though they were walking through a long tunnel of bureaucracy to reach Canadian soil The long tunnel thesis is the basis of Alison Mountz s wide ranging investigation into the power of states to change the relationship between geography and law as they negotiate border crossings Mountz draws from many sources to argue that refugee receiving states capitalize on crises generated by high profile human smuggling events to implement restrictive measures designed to regulate migration Whether states view themselves as powerful actors who can successfully exclude

outsiders or as vulnerable actors in need of stronger policies to repel potential threats they end up subverting access to human rights altering laws and extending power beyond their own borders Using examples from Canada Australia and the United States Mountz demonstrates the centrality of space and place in efforts to control the fate of unwanted migrants
