

THE TOP 10 BARRIERS TO PATIENT EDUCATION

01

Fear

Your patient may need to overcome fear before being open to teaching.

03

Health status

Adjust your education plan based on the level of your patient's health status. Materials about the early stage of a disease may not be beneficial if the patient's disease has progressed.

05

Complex issues

Patient education can be challenging because sometimes healthcare providers need to tackle multiple issues at once.

07

Invisible results

Patients may not be interested in making changes to their health when there are no visible "dramatic results."

09

Capacity to handle information

Individuals have different limits when it comes to handling sensitive information. Give your patient only the amount of information they can handle at a time.

02

Receptive to teaching

Some patients embrace learning. Others need nudging and encouragement from their clinicians.

04

Lack of time

Due to strict scheduling, physicians often do not have enough time to educate patients. Patients can feel rushed and unable to voice all questions and concerns when they have a short time with their doctors.

06

Rising healthcare costs

In trying to save costs, patients tend to spend less time in the hospital before procedures such as surgery. Therefore, nurses and physicians have less time to teach patients about such procedures.

08

Licensing for telehealth services

It can be challenging for healthcare providers to get the licensing for telehealth services.

10

Lack of knowledge and skill level of health providers

Clinicians, nurses, and health educators need to keep updating their training on patient education.
