**Mothers Who Murder** Dr Xanthe Mallett,2014 Child murder A social taboo and one of the most abhorrent acts most of us can imagine Meet the women found guilty of murdering their own children They represent some of the most hated women in Australia The infamous list includes psychologically damaged sometimes deranged women on the edge But as we will see accused doesn't always mean guilty Among the cases covered is that of Kathleen Folbigg accused and found guilty of killing four of her children even with a lack of any forensic evidence proving her guilt Rachel Pfitzner who strangled her 2 year old son and dumped his body in a duck pond as well as Keli Lane found guilty of child murder though no body has ever been found Dr Mallett goes back to the beginning of each case death's ground zero That might be the accused's childhood were they abused Or was their motivation greed or fear of losing a partner Were they just simply evil Or did the media paint them as such against the evidence and leading to a travesty of justice Each case will be re opened the alternative suspects assessed the possible motives reviewed Informed by her background as a forensic scientist Xanthe will offer insight into aspects of the cases that may not have been explored previously Taking you on her journey through the facts and reaching her own conclusion as to whether she believes the evidence points to the women's guilt Hear their stories

 Gurian,2021-09-30 This book reframes the study of multicide that is serial and mass murder to use objective measures and  
 aims to expand our understanding of multicide offending through descriptive and inferential statistical analyses of different  
 homicide patterns of the offenders Criminal homicide and multiple murders are rare occurrences that typically account for a  
 very small percentage of all violent crimes in most countries Despite this low occurrence homicide continues to be an area of  
 intense study with a focus on subjective measures and classifications The research and analysis based on a database of over  
 1 300 cases contributes to the criminological study of violence and draws distinctions between the types of offenders  
 partnered and solo serial and mass male and female etc from a range of different countries and across decades Traditionally  
 studies of homicide focus on male offenders and theories of offending are then applied to females and co offenders The  
 research presented in this book reveals that women and partnered offenders have very different homicide patterns from men  
 Looking at the history of multicide offending this book uses descriptive and inferential statistical analyses to directly compare  
 differences in offending and outcome patterns across multicide offender types This exploration of the multidimensionality of  
 homicide at an international level is useful for scholars and students interested in criminal justice criminology psychology
