Cumulated Index Medicus, 1993 **South African Journal of Science**, 1986 **The Cancer Handbook, 2 Volume Set** Malcolm Alison, 2007-07-30 The Cancer Handbook provides a comprehensive overview of scientific and clinical information in cancer research and medicine oncology This area is one of the most intensively studied in biology and medicine resulting in a huge amount of new information being published every year This book summarizes and explains key facts and recent developments It is aimed at a wide variety of readers who need easy access to knowledge concerning all major aspects of cancer biology without too much clinical detail or specialist research material The Cancer Handbook stands out from existing oncology textbooks and reference works in that it bridges the gap between the molecular biology of cancer and clinical diagnosis and treatment As more and more laboratory research is applied to clinical management e.g the use of monoclonal antibodies as drugs it is important that clinicians understand the aetiology of the disease and the molecular basis of the new therapeutic approaches It is also important for laboratory scientists to appreciate the potential applications of their research and the practical issues involved in translating it to

clinical practice For this second edition all the sections have been fully revised and updated with new chapters addressing important topics that have gained prominence in recent years New editors and authors have brought additional expertise to the project For example in the section on the Molecular and Cellular Basis of Cancer there are new chapters on stem cells epigenetics and microRNAs as well as chapters on the links between cancer and development and inflammation In the Treatment section the emphasis is now on multidisciplinary team management of different cancers plus there are new chapters on clinical trial design RNA interference and rational drug design The page design and the quality of the diagrams has been improved with all illustrations now in full colour The glossary has been made more informative and easy to use

Annals of the Academy of Medicine, Singapore Academy of Medicine (Singapore),1981      **Changing Cancer Patterns and Topics in Cancer Epidemiology** M. Kurihara,1987-06-30 Consists of the proceedings of international conference and symposia      **Cancer Incidence in Five Continents** D. M. Parkin,1997 The aim of the Cancer Incidence in Five Continents series is to present data on cancer incidence from reliable registries in a standardized way so that comparisons between geographical areas and ethnic groups may be made with confidence The efforts to build up cancer registration in areas of the world for which very little information on cancer occurrence is available are bearing fruit and some of the results appear in this volume Of particular note is the reappearance of Uganda Kyadondo County a registry for which data were published in Volume I but which was not able to contribute data until the period covered by the present volume There are contributions from five new registries in Asia including for the first time data from Korea and Vietnam and from four in South America presenting data from Argentina and Uruguay for the first time An innovation in Volume VII is the analysis of histological sub types for selected sites using data which have been checked for validity      *The Biology and Utilization of Shrubs* Cyrus McKell,2012-12-02 The Biology and Utilization of Shrubs brings together the wide range of information about shrubs from many disciplines and world locations The book is organized into seven parts Part I describes the major shrublands found on each of the vegetated continents It provides an overview of the dominant shrubland types as well as the associated features of soil and climate that influence the geographic distribution of major shrub species Part II discusses environmental influences and plant responses Part III considers the range of genetic diversity for important traits and how these may vary in different habitats Part IV discusses the effects of stress on physiological processes of shrubs and the kinds of strategies shrubs employ to meet physiological stress Part V offers evidence to support the claim that the many virtues of shrubs provide a basis for sustaining shrub use for livestock fodder wildlife habitat reclamation and erosion control fuel and naturalized landscaping Part VI outlines methods for collecting and processing seeds from natural stands or from superior genotypes planted in seed production orchards Part VII describes cultural adaptation to shrub use in a livestock dominated primitive culture followed by a detailed economic analysis of establishing shrub plantations to improve livestock production
