Mood And Modality:

Mood and Modality Frank Robert Palmer, 2001-04-16 Palmer investigates the category of modality drawing on a wealth of examples from a wide variety of languages

Mood and Modality Frank Robert Palmer, 1986 Mood subjunctive etc and modality can may must etc are familiar terms in linguistics but this is the first book to present a systematic and principled description across a wide variety of languages of what can be considered a single grammatical category The notion of modality is notoriously vague and a number of definitions have been proposed encompassing the attitude or opinion of the speaker speech acts subjectivity non factivity non assertion possibility and necessity Often such definitions have been language specific By examining data including data on evidentials from many different languages native American and Australian languages for example as well as Latin Greek English and others F R Palmer is able to compare and contrast the ways in which modality is grammaticalized its various functions and its relation to other grammatical categories From this typological approach arise cross linguistic generalisations and theoretical conclusions that will interest the specialist as much as the advanced student Written with F R Palmer's characteristic clarity and attention to detail *Mood and modality* is a major contribution to our understanding of a basic topic in language studies

The Oxford Handbook of Modality and Mood Jan Nuyts, Johan van der Auwera, 2016-09-08 This handbook offers an in depth and comprehensive state of the art survey of the linguistic domains of modality and mood An international team of experts in the field examine the full range of methodological and theoretical approaches to the many facets of the phenomena involved Following an opening section that provides an introduction and historical background to the topic the volume is divided into five parts Parts 1 and 2 present the basic linguistic facts about the systems of modality and mood in the languages of the world covering the semantics and the expression of different subtypes of modality and mood respectively The authors also examine the interaction of modality and mood mutually and with other semantic categories such as aspect time negation and evidentiality In Part 3 authors discuss the features of the modality and mood systems in five typologically different language groups while chapters in Part 4 deal with wider perspectives on modality and mood diachrony areality first language acquisition and sign language Finally Part 5 looks at how modality and mood are handled in different theoretical approaches formal syntax functional linguistics cognitive linguistics and construction grammar and formal semantics

Mood and Modality: Conditional Clauses Liane Weigel, 2005-04-20 Seminar paper from the year 2002 in the subject English Language and Literature Studies

Linguistics grade 2 University of Potsdam language English abstract When Frank Jackson in the introductory passage of *Conditionals* questions the theory of conditionals the answer is given with there is no theory of conditionals which has won general acceptance Instead there are a number of competing theories Jackson 1991 3 The following pages of the book present such competing theories all searching for the logic in conditional clauses However the understanding of conditional

clauses in languages e.g. in the English language can be very difficult regarding to the different types and their functions. On the one hand functional Grammar declares the facts of grammar which are connected with conditional clauses but the main focus is on its usage and the function. Therefore this dissertation investigates mood and modality which can be expressed by conditional clauses but is also connected with modal verbs first in a declarative and secondly in an analysing way in order to find out what the importance especially of conditional clauses and modal verbs for the language is. In the first part after this introduction modal verbs as the core notions of modality are presented regarding their meaning and importance to express mood and modality judgements and attitudes. The next part presents an attempt of understanding the complex theory of conditional clauses as a basis for analysing an academic text. An analysis of how modality judgements and attitudes are expressed in an academic text follows in the next part focusing on the use of conditional clauses. Although the theory and use of conditional clauses with reference to mood and modality are not exhausted with this dissertation the last part tries to summarize how mood and modality judgements and attitudes of speakers can be expressed with the help of conditionals.

Modality and Mood in Romance Martin G. Becker, Eva-Maria Remberger, 2010-12-20 This collective volume contains a selection of research contributions presented at the 30th Deutscher Romanistentag German Conference on Romance languages and literatures in 2007 in Vienna in the section Mood and Modality in Romance. The Romance languages studied here include Portuguese, Italian, Spanish, Romanian, Catalan and French. All contributions thematically explore the status and importance of modality and mood and their reciprocal relationships with reference to theoretical approaches. *Mood and Modality* F. R. Palmer, 2001-04-16 Since the publication of F. R. Palmer's *Mood and Modality* in 1986 when the topic of modality was fairly unfamiliar there has been considerable interest in the subject as well as in grammatical typology in general. Modality is concerned with mood, subjunctive etc. and with modal markers such as English modal verbs can, may, must etc. and is treated as a single grammatical category found in most of the languages of the world. Palmer investigates this category drawing on a wealth of examples from a wide variety of languages. **A Grammar of Aguaruna (Iiniá Chicham)** Simon E. Overall, 2017-02-06 This book is a descriptive grammar of Aguaruna known to its speakers as Iini Chicham, a Jivaroan language spoken by some 55,000 people in the northwest Peruvian Amazon. Aguaruna is typologically and historically significant because of its location in the eastern foothills of the Andes, right between the Andean and Amazonian linguistic areas. Some typologically unusual syntactic phenomena, for example in the areas of grammatical relations and case marking, make this description relevant beyond the areal context. This is the first full grammar of a Jivaroan language covering phonology, morphology and syntax as well as addressing some issues in discourse structure. It is an important work for specialists in South American languages as well as for linguists working in more general typological fields. Restructuring and Functional Heads Guglielmo Cinque,2006-02-02 This volume collects the recent published articles of Guglielmo Cinque of the University of Venice one of the world s top linguists The book is divided into two sections the first on restructuring a central topic in Romance syntax and with connections to other language groups as well The second part focuses on the consequences of treating clausal functional heads as members of a universal hierarchy in the domain of morphosyntax offering a new perspective on many intricate problems arising in a variety of natural languages

The Verb in Turkish Eser Erguvanl? Taylan,2002-02-21 This book is a collection of articles on the properties of the verb in Turkish as the core element of clause structure by linguists from different parts of the world Articles present the most recent analyses on the Turkish language carried out in various theoretical orientations within the functional formal range The topics researched in the contributions center around properties of verbal inflection as the morphological means to express temporal aspectual and modal notions and the implications of these morphological configurations to syntactic theory **Lectures on**
